

*Every MOM is a Superhero*

*Product catalogue*

2024

*Neno means child. That's it. That's the clearest message we could send to the world with our products. They are dedicated for Parents, to make their daily life easier and to enjoy the time spent with their children. Neno is a Polish company that delivers products that meet your expectations of quality, that are visually attractive, practical and safe to use.*

*Neno products are mostly aimed at young Parents of children at the age of 0–3. Our mission and philosophy is to provide support and comfort for parents during that most beautiful, but also demanding stage of life. We are parents ourselves and know the perils of battle against colic, fever, runny noses or feeding problems, and how invaluable any amount of help is. And all of that for the sweetest reward of all – the smile of your child.*

*First Neno brand baby monitors, infrared thermometers and breast pumps were a smashing success. A community surrounding our products was born, composed of satisfied mothers. The process design and creation of Neno products is supported by midwives, physicians and nurses. We also cooperate with childbirth schools and lactation experts.*

# Meet the Neno bottle breast pumps

- 1 All Neno breast pumps are wireless, 2-phase or 3-phase.
- 2 The breast pump kit contains a 24 mm funnel (the most common womens' choice), made of soft, flexible silicone.
- 3 It is possible to match each breast pump with a silicone funnel in three sizes: 21 mm, 24 mm, 27 mm
- 4 The Neno breast shields are created from soft material which prevents chafing and irritation of the nipples.
- 5 The breast pump kit contains:
  - a bottle with a teat for babies from the first days of life,
  - a bottle stand so that the bottle can be set down comfortably with milk, without fear of spilling the milk,
  - stopper for convenient, clean storage of the funnels,
  - spare valves,
  - a bottle stopper to hygienically store the milk in the refrigerator.
- 6 Neno breast pumps have a special closed system, which means the highest standard of safety and hygiene for breast pumping.

# *Recommendation*

## OF THE POLISH SOCIETY OF MIDWIVES

Neno breast pumps have received an official recommendation from the Polish Association of Midwives. This proves that our products are not only appreciated by breastfeeding women, but also find recognition among experts.

This is not the first such recommendation in the medical community. At the beginning of January, Anna Bulczak from the 'Zaufaj Położnej' portal has taken patronage of our products. This is a great honour for us and a motivation for further work.

### **What does the recommendation of the midwifery community provide?**

Above all, it is proof that the recommended products are in line with current medical knowledge and safe for patients. Neno breast pumps are the answer to the most common lactation problems. The mechanisms used in Neno products - such as the third pumping phase - are designed to stimulate the breasts to produce even more milk. The third extraction phase of the Neno breast pumps combines elements of both the stimulation and active extraction phases. The solution introduced faithfully mimics a baby's natural sucking pattern, so that the glands are stimulated to work even harder.

In addition, the Neno breast pumps use 100 per cent media separation, which ensures complete hygiene and safety. The position of the diaphragm in Neno breast pumps provides a tight barrier between the bottle and the funnel and the tubes and motor of the device. This design protects the tubing and the motor of the breast pump from contact with the milk and keeps the breast milk hygienic and fresh. The closed system is used in both Neno single and Neno double breast pumps.

The Polish Midwifery Association is an association of midwives from all over Poland, whose tasks include raising the quality of midwifery care, as well as participating in the development of health programmes in the care of women and families. The association organises a number of educational campaigns and - like the Neno brand - supports natural breastfeeding. We are proud of the recommendation given and thank you for your trust.

## nenoprefetto

3-phase wireless waterproof  
single breast pump

It is our third premium breast pump. The three-phased, cordless Neno Perfetto electronic breast pump is equipped with an IPX6 waterproof function. It is distinguished not only by its unique and elegant design but also by the presence of a third, additional phase of pumping. This mode is perfect for stimulating lactation, as it faithfully mimics the sucking movements of a baby. By using the third pumping phase, the breast is properly emptied, and – as a consequence – the mammary glands are stimulated to continue producing food.

*What will you  
do with your  
free hands?*

# *freedom series*

## *Meet the Neno hands free breast pumps*

- 1 The new Freedom Series breast pumps have been designed for women who want comfort and independence. Lightweight and portable, they allow any mother to express breast milk freely and hands-free.*
- 2 Instead of bottles, the hands-free breast pump has collection cups. The cup design means you don't have to hold it in your hand. Just place it in your nursing bra.*
- 3 Expressing breast milk with a hands-free breast pump frees your hands so you can do other activities such as computer work, reading or light housework.*
- 4 The milk collected in the cups can be easily poured directly into the bottle.*
- 5 The breast pumps are supplied with ergonomic, anatomically shaped silicone breast shields, which can be adjusted in size with reducers.*
- 6 Every unit in the Freedom Series operates in the 3rd phase. The use of this innovative mode is very helpful when lactation is starting and milk stasis occurs.*

velo**

### 3-phase hands free double electronic breast pump

The Neno Velo is a product that is the answer to the needs of mothers who appreciate convenient and practical solutions. The hands-free breast pump consists of a set of collection cups connected to a compact pump. Efficient milk expression is made possible thanks to its three-phase action (with 8 levels of regulation) and to the breast shields, the size of which can be adjusted from 24 mm to 20 mm. The lanyards supplied in various lengths allow the breast pump to be hung around the neck or clipped to a trouser belt for invaluable comfort when pumping.

## *nen-* *stella*

### *disposable nursing pads*

The Neno Stella is one of the first products in the Neno Care series. The ultra-thin, breathable nursing pads provide round-the-clock protection and prevent your underwear from getting dirty. Thanks to their flower design, they fit perfectly in the cups of your bra. They are very hygroscopic, so they soak up breast milk and leave the skin clean and dry.

## нено vista

wireless pan&tilt video baby monitor

The Neno Vista is an electronic nanny that provides high quality HD video transmission. You can keep an eye on your baby 24/7 with the included receiver, which has a 5-inch display. In addition to standard features such as pre-recorded lullabies, room temperature measurement and two-way communication, it has a long range (up to 300m outdoors) and a controllable rotating head. Another advantage is that it can be mounted in two ways - using a wall bracket or a flexible stick that can be wrapped around the cot's rail.

Screen: 5 inch

Power: DC 5V 1A

Signal range: up to 300 m (outdoor), up to 50 m (indoor)

Horizontal rotation angle: 165° left, 165° right

Vertical rotation angle: 90° top, 45° bottom

Screen resolution: 1280×720 px

Built-in accumulator (receiver) Li-Ion 3050 mAh

Frequency range: 2408~2468 MHz 19 dBm

Night mode: up to 5 m

Work temperature: -10~45°C

Dimensions: 162×86×22 mm receiver, 71×71×116 mm camera

Weight: 200 g receiver, 190 g camera

# nenoi ivo

## pan&tilt IP video baby monitor with receiver

The Neno Ivo is a premium electronic baby monitor designed for parents who want to keep an eye on their little ones with top quality equipment. The product stands out for its specifications, as it includes a receiver with a large display (5 inches, HD resolution) and is also integrated with the TUYA mobile app. Precise monitoring is possible thanks to a controllable head that moves vertically and horizontally. In addition to options such as pre-recorded lullabies and 4x zoom, the Nanny has a built-in sensor that detects any movement in the child's environment.

Screen: 5 inch

Signal range: up to 500 m (outdoor), up to 100 m (indoor)

*silicone bedside lamp for kids*

The rabbit-shaped silicone bedside lamp will gently illuminate the room where the baby falls asleep. It is also the perfect play companion for your child. When your child touches and holds the lamp tail, the color of the light starts changing. The lighting will smoothly change from warm, intense light to cooler, cold colors. You can also control the light intensity — from bright to soft and dim colors. The set includes a convenient remote control that allows you to control the device from a distance.

## neno perse

hot and cold pack

The soft and gentle reusable gel compress Neno Perse is an effective way of relieving a variety of discomforts without irritating the nipple. Thanks to its extra large diameter, it covers a large area around the breast. Its flexible design means it fits perfectly and is comfortable to use. It effectively reduces swelling and inflammation, alleviating pain and providing relief. It is an essential aid for breastfeeding mothers and can also be used in combination with a breastpump. Applied to the breast, it helps to unblock the milk ducts and improve milk flow.
