AWARDS FOR
K&G TRADE COMPANY
The owner of the Neno brand:

Fast sterilization

With an intuitive Neno Luna sterilizer you can keep the bottles, teethers and spare breast pump parts hygienic and sterile in 10 minutes. It is a must have if you care about proper hygiene and protection against any microorganisms, viruses and bacteria. The device meets the needs of aware mums who care about safety, hygiene and sterility.

Useful food heater

The device heats food up to the 60°C. It is practical whenever you need to quickly feed your baby during nightly wakings. The protective cover guarantees quick and even heating. You are sure that the meal has an appropriate temperature. It is comfortable and time-saving. Let Neno Luna do this for you.

Fast heating program

Every minute with your baby is precious. Heat your baby's food in the express mode which works in an instant! The device heats breast milk in a safe way and preserves each of the valuable breast milk ingredients. Be smart with Neno Luna steriliser 6w1!

Maintaining the food temperature

Maintaining the temperature is an amazingly practical function for mums with little kids. It is a comfortable and time-saving. The food is constantly warm - perfect for your baby. You can set the temperature from 35 to 60°C. Such a wide range enables you to personalise the settings according to your needs.

Step by step defrosting

The heater defrosts the food progressively and evenly keeping its valuable nutrients. With Neno Luna you can defrost the breast milk in Neno bags available at our online store. Forget about time consuming defrosting using old fashioned methods, do it in couple of minutes with Neno Luna.

Compatible with bottles, jars and breast milk bags

The device is universal - you can heat and sterilise not only milk bottles, but also jars with food for your little baby. The diameter of the strainer is about 8 cm, so you can place here variety of milk bottle sizes and spare breast pump parts. Due to Neno Luna you can take care of the proper hygiene of accessories for your baby in a convenient way.

LCD touch screen

Handling of the device is pretty intuitive and easy thanks to the intelligent and smart LCD panel with touch functional buttons. The display has a button to set modes, worktime and temperature. Clear display 2.2" makes the device easy to use even at night. It is intuitiveness in every detail.

Compact size

The steriliser consists of only 3 elements. It is minimalistic and compact which in turn makes it easy to use and keep clean.

Classy design

Neno Luna represents a smart and esthetic minimalism. A clear LCD display and big functional buttons make the usage intuitive. It is stylish and elegant, so it will fit perfectly to every interior.

Heat the breast milk

No more time-consuming and tedious milk temperature measuring! Neno Luna is an intelligent device thanks to which you can heat the food for your baby quickly and efficiently. Choose "milk" mode and the Neno Luna will do the rest.

6in 1

Space-saving
