## Bella Twin Moon

Two-phase, cordless  
electronic breast pump

# *New version of the iconic breast pump*

Bella Twin Moon is the new version of the iconic Bella Twin, one of Neno's most popular breast pumps for the past 4 years. Thousands of mums have grown to love it for its invaluable support in every aspect of breastfeeding. Now it's time for you!

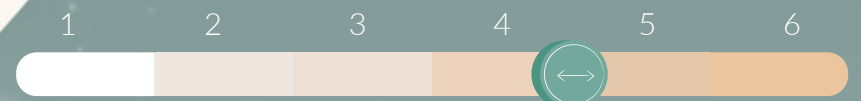

# *Reliable dual-phase technology*

The DuoComfort system is a state-of-the-art two-phase technology with adjustable suction power (6 and 9 levels) that allows the Bella Twin Moon to mimic your baby's natural breastfeeding rhythm.

The device switches between the phases automatically, but you can also change them manually. In the first mode, the pump stimulates the nipple gently and slowly, while in the second mode it switches to pumping with long and deep strokes. This makes pumping fast, efficient and comfortable.

*Phase I - Stimulation mode*

*Phase II - Deep suction mode*

## *100% safe*

Neno breast pumps have a clever design to ensure that milk circulates properly and flows directly through the breast shield into the bottle. Thanks to this system, there is no chance of milk escaping and becoming contaminated.

## *Precisely shaped breast shield*

The Bella Twin Moon breast pump comes with soft and gentle silicone breast shields with a diameter of 24 mm. If this size does not suit your needs, other options are available in our shop:

- 21 mm breast shield (for 17 mm and 18 mm diameter nipples),
- 27 mm breast shield (for nipples between 22 mm and 24 mm in diameter),
- 19 mm reducer (for 15 mm and 16 mm diameter nipples).

## *Precise timer*

The built-in timer counts the time from start to finish. Thanks to its precision, you always know how much time is left before the end of each session. It also comes in handy when you use the popular 7 min - 5 min - 3 min pumping method.

## *Instant sterilisation*

Just a few minutes – that's all it takes to sterilise the parts of your Bella Twin Moon breast pump. You can do this the traditional way by placing the parts in a pan of boiling water, or you can use the reliable Neno steriliser.

# *Exclusive all-in-one set*

The breast pumps will be available to users in a unique deluxe version, which has not been available for sale before. In addition to the anti-colic teats with shield, bottle caps, breast shields, 150ml bottles and USB-C cable, the set includes additional accessories: two breast milk storage bags and two pairs of Neno Stella nursing pads.

# *Express directly into the breast milk bag*

This breast pump allows you to express your milk hygienically directly into the leak-proof bag, eliminating the need for overflow and making it easy to store your breastmilk safely in the fridge or freezer.

# *Pump anywhere*

The Bella Twin Moon is very quiet and comes with a powerful battery that allows you to pump wirelessly both at home and on the go. You can pump several times on a single full charge.

# *Attach the collection cups to your breast pump*

Now you can easily turn Bella Twin Moon into a hands-free breast pump! With the option to add shells, you can pump while reading a book, working on the computer or relaxing.

A close-up photograph of a pregnant woman's midsection. She is wearing a white, ribbed tank top. Her hands are gently resting on her bare, glowing skin belly. The lighting is soft and natural, highlighting the texture of her skin and the fabric of her top. The background is a neutral, light grey color.

## *Professional support for mums*

The twin breast pump is an indispensable support for daily pumping and lactation problems. It is especially recommended for mothers who are waiting for a caesarean section or who are planning to breastfeed for a longer period of time. It is also ideal for active women returning to work after maternity leave.

## *Ideal as a gift*

A modern, cordless breast pump, available with a range of accessories, is the perfect gift for a new mother, helping her to get started. You can also personalize its operation by adjusting the suction level and rewiring the tubes so that it only pumps from one breast
