## *Professional nasal aspirator*

The Neno Grasso professional nasal aspirator is designed for children from the age of 1 to 6 years. This small but effective device removes the runny nose that makes it difficult for your little one to breathe. It is an essential tool for newborns and babies who cannot yet blow their own nose. You can ensure your child's comfort both during an infection and in everyday situations.

# *Efficiency and power*

Neno Grasso combines the function of **the Active Airflow System** with concern for your baby's comfort. It provides effective yet gentle nasal and sinus cleansing without irritating sensitive mucous membranes. It copes well with both runny nose and thick secretions.

The aspirator works:

- with direct contact to clean the nasal cavity thoroughly;
- from a short distance to remove secretion from hard-to-reach areas of the upper airways.

## *The effective aspirator with adjustable suction power*

With up to 9 levels of suction power adjustment, you can easily adapt the power of the device to the mucus density. From gently cleansing in the case of a slight runny nose to effectively dealing with larger difficulties. Comfortably and safely every time.

# *3 ergonomic tips*

*The aspirator is equipped with three interchangeable silicone tips. Their appropriately shaped design ensures safe use and allows them to be adjusted to suit your child's needs.*

# *Melodies and white noise*

Two preloaded melodies and white noise make the whole procedure less stressful.

The gentle sounds help to create a relaxing atmosphere so that your baby not only gets rid of the runny nose, but also remains calm.

# *Cordless operation*

Stop worrying about cables! The wireless operation of the aspirator allows you to be completely mobile. Use it anywhere and anytime – on the go, at home and while walking.

# *USB-C charging*

No matter where you are, all you need is a universal USB C cable to get your aspirator up and running. This quick and convenient solution is ideal for parents who are constantly on the move.

## *Easy to maintain hygiene*

*With a separate secretion container and easy-to-clean accessories, taking care of the device's hygiene is simple and convenient. You can also sterilise the individual components without any worries, for example using the Neno multifunctional device.*

## *Essential accessories kit*

The extended accessory pack for the Neno Grasso aspirator includes three tips, two tubes of different lengths and up to 5 filters. You'll also find practical cleaning brushes with which to keep your device in perfect condition.

# *Storage drawer for accessories*

Forget about searching for lost tips or filters! The integrated accessory drawer allows you to keep everything tidy and handy.

# *Simple operation*

*The easy-to-use control panel allows you to start the aspirator in seconds. No fuss – simple, fast and convenient.*

# *Light bulb*

*The lamp is a practical solution designed with your baby's safety in mind. It provides precise illumination inside your baby's nose, making it easier to clean in low light.*

# Lightweight and mobile

The Neno Grasso is lightweight, compact and ready to carry. Ideal for parents who want to have the equipment they need with them at all times. It will fit anywhere – in your bag, backpack and suitcase! When transporting, you can use the included pouch to protect the device from mechanical damage.

 **0-6**  
years

*A device that will  
last for many years*

The sturdy design of the aspirator and its adaptability to changing needs make it a reliable support from the first days of life through to the next few years (up to the age of 6).
