Aspirator for special tasks

A newborn or infant is not able to get rid of the secretion that clogs its nose on its own. This is why a professional aspirator is a real lifesaver. It quickly and gently removes lingering mucus, restoring your baby's breathing ease and wellbeing. So your little one can sleep peacefully, play and enjoy every moment again.

Efficient and reliable operation

Experience the advanced Active Airflow function! The dynamic airflow gives the Neno Nariz nasal aspirator the power to effectively clear the airways without irritating sensitive mucous membranes. It perfectly handles secretions of varying densities, helping to clear excess secretions from infections, allergies and sinusitis.

The aspirator sucks up the mucus:

- through direct contact, clearing the nasal cavity;*
- from a short distance, clearing the upper airways.*

Adjustable suction power – up to 9 levels

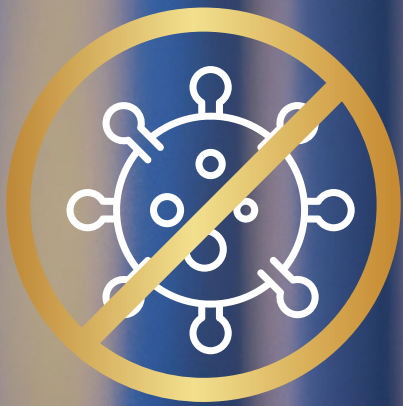

The Neno Nariz Aspirator is equipped with a 9-stage suction power adjustment. This allows the intensity to be perfectly matched to the density of the secretion. In addition, the ability to control the power reduces the risk of irritation and discomfort.

Sterilising UV drawer

The drawer included with the aspirator is equipped with a UV lamp. You can store and sterilise aspirator components and cleaning accessories in it.

Stop

bacteria, viruses and fungi

Ultraviolet light has the ability to destroy bacteria, viruses and fungi. It damages the DNA or RNA of these micro-organisms, which prevents them from continuing to reproduce and cause infection.

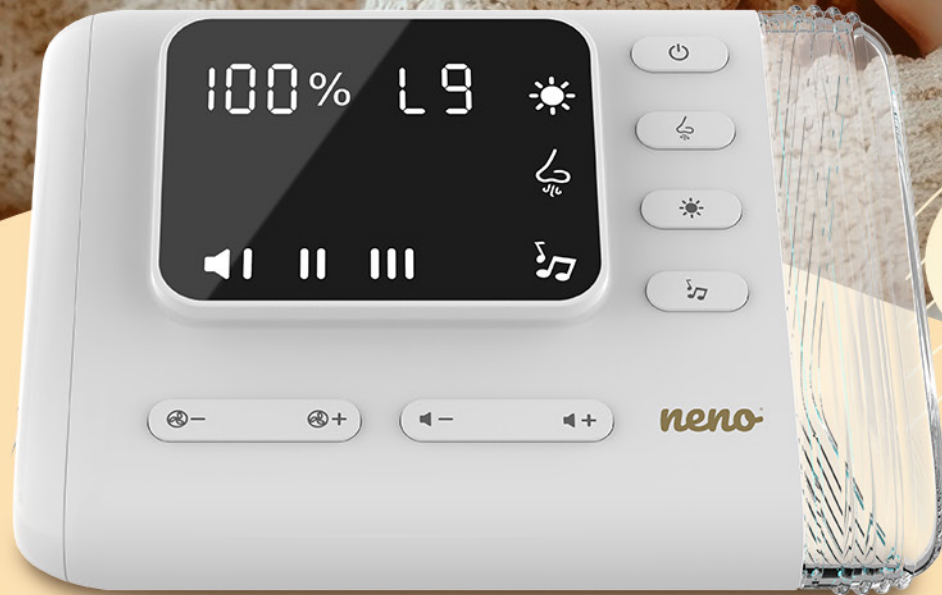

Silicone tips included

The three ergonomic tips are made of soft silicone. Their unique contoured shape is inspired by the physiology of a baby's nose. You can easily adapt them to your baby's needs at different stages of development.

nenos PREMIUM

Relaxing sounds

The Neno Nariz plays soft melodies and white noise to relieve tension and help your little one relax while expressing secretions.

neno PREMIUM

*Full mobility
without cables*

Use your device wherever you need it – on the move, at home and outdoors. Thanks to its wireless design, nothing limits you.

Universal charging

The USB-C port allows the aspirator to be charged quickly and conveniently with a single cable. This is ideal for parents who are constantly on the move.

nenos PREMIUM

Easy to maintain hygiene

A separate secretion container and easy-to-clean accessories make cleaning quick and uncomplicated.

*Additional accessories
included*

The extended kit includes tips, two lengths of tubing and up to five filters. Cleaning brushes and a handy storage pouch are also supplied.

nenor PREMIUM

Intuitive operation

Thanks to the intuitive control panel, using the aspirator is extremely easy. It only takes a few seconds to start up!

nenor PREMIUM

Precise backlighting

The integrated LED light allows you to see the inside of your baby's nose better, which is especially useful when you do not have access to good lighting.

нено PREMIUM

Handy and lightweight

You can take the Neno Nariz Aspirator with you anywhere. Thanks to its lightweight and compact size, it will fit into your bag, backpack and suitcase.
