Swap a cold wipe for a warm one

The Neno Abrazo is a wet wipe warmer that takes daily care to the next level.

Cold wipes can cause unpleasant sensations for the baby, such as thermal shock. This makes nappy changes difficult and introduces unnecessary stress.

With Neno Abrazo, warm and always moist wipes gently wrap the baby's skin, eliminating the cold and providing relief and peace of mind.

Intuitive, simple operation

The warmer is equipped with an easy-to-use touchscreen panel for quick and convenient use. Thanks to the intuitive interface, you can easily adjust the device's settings to suit your needs.

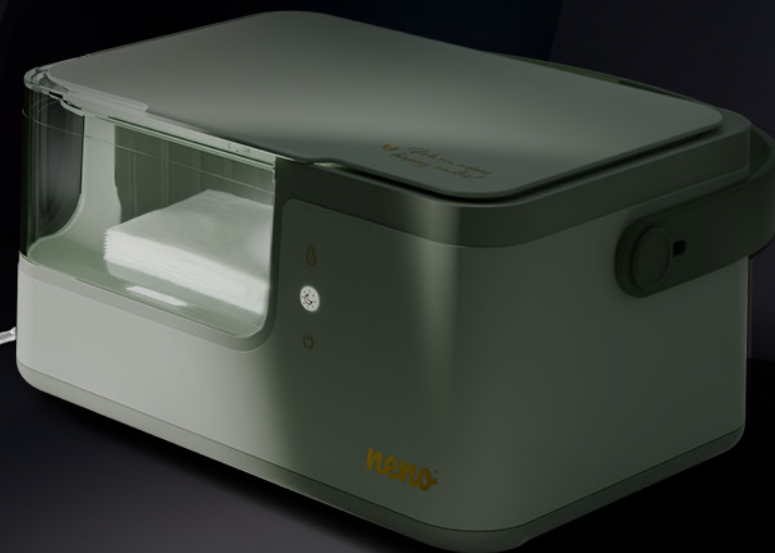

two adapters included:

On hand when travelling

Keep your little one comfortable under all conditions! Thanks to the mains adapter and the car adapter, you can also have the warmer at hand when you travel.

Silent and discreet operation

The Neno Abrazo operates almost silently, which allows it to be used even at night. This ensures that the device does not disturb your rest or that of other household members.

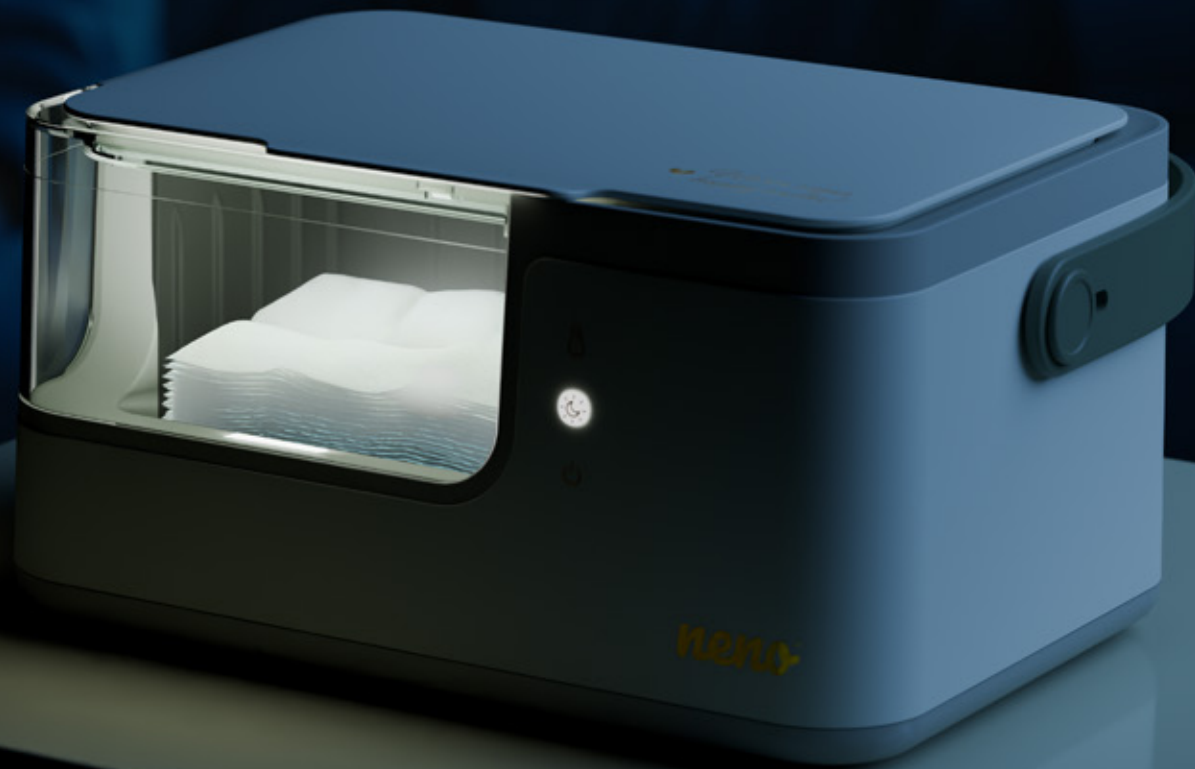

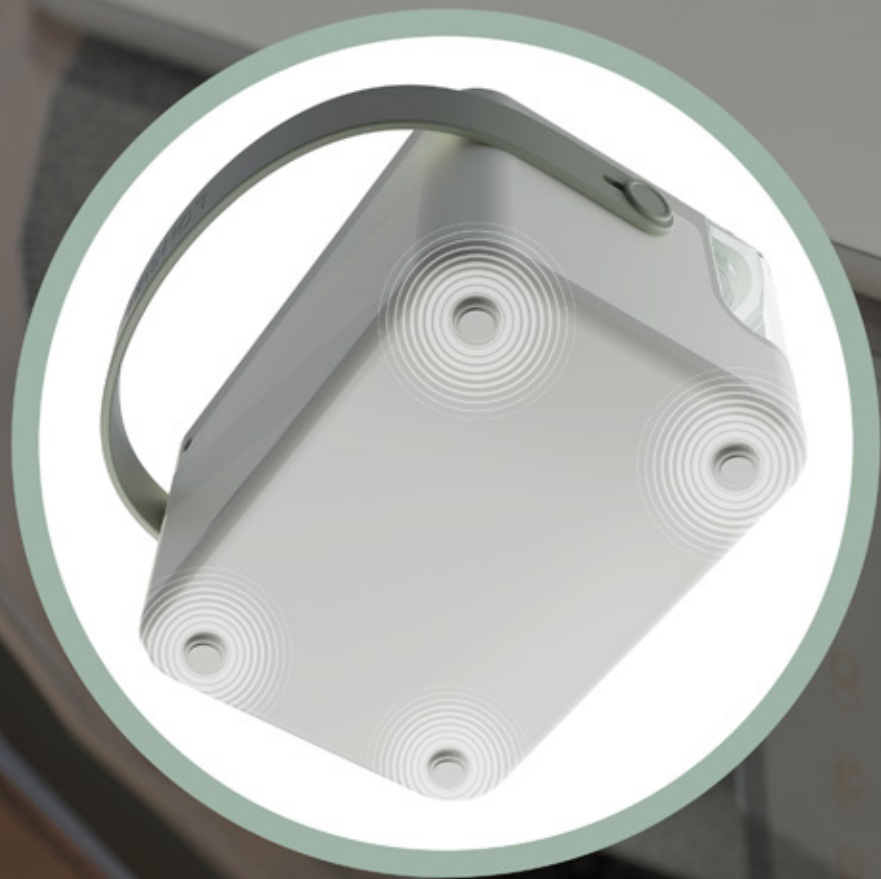

100% moist wipes

The warmer guarantees that the optimum moisture level is maintained in the wipes throughout the day, ensuring that they are always ready for use. Thanks to its proven heating technology, the device effectively prevents drying out. This translates into efficiency in its operation and daily care.

Built in lamp with soft light

The gentle light of a bedside lamp creates a cosy atmosphere. This is ideal for night-time care. It provides sufficient visibility without disturbing the sleep of the baby or the parents.

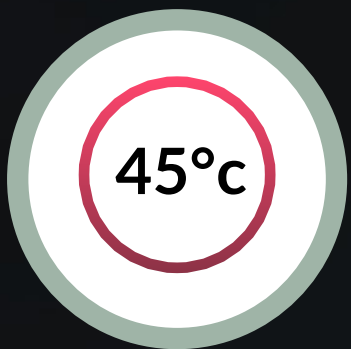

нено

Non-slip base

The non-slip base ensures that the device remains stable on any surface. This prevents it from slipping, ensuring comfort and safety during use.

Adjustable heating strength: 45°C and 55°C

The Neno Abrazo has two heating levels (45°C and 55°C), allowing you to precisely adjust the temperature to suit your little one. By choosing the right temperature, you provide your baby with the ideal conditions for daily care.

Comfortable handle

Need to move your warmer from room to room, or while walking? It will be easier with the Neno Abrazo! The warmer has been equipped with a convenient handle, so you can easily take it wherever you intend to go yourself.

Touch panel lock

The lock prevents accidental activation or changing of settings, so you can use the warmer without any worries.
