Large display

Your weapon against fever

The Neno Medic T08 is a robust medical device that will help you take care of your health every day. With instant measurement in 1 second and simple operation, you will avoid stress. Instead of wasting time waiting, you will quickly and conveniently measure your temperature both day and night. In addition, when your body temperature rises, the thermometer will notify you with a short beep.

Professional and precise performance

The thermometer provides a fast and accurate result with minimal margin of error, making it ideal for both home and professional use. With a precision of 0.2°C, you can rest assured that you will always know what your baby's temperature is.

Infrared technology

The Medic T08 uses infrared technology so that you can measure in a non-contact manner.

Intelligent mode change system

The thermometer changes modes independently. Simply pull off the magnetic cap to measure the temperature in the ear. Switching is immediate and the device always delivers the most accurate data. This means that you can adapt its operation to your current needs without stress or unnecessary steps.

Ear

Forehead

Clear display

The large LED display makes changing the temperature unit and reading the results simple and intuitive. The digits are clear and the screen itself is backlit, making the whole procedure possible even at night.

36.6 °C

*Forehead temperature
measurement*

Forehead temperature measurement

Forehead temperature measurement is particularly useful for newborns and babies. The Neno Medic T08 takes the measurement in 1 second, which means no stress or anxiety, for both you and the little ones.

**Measuring
the temperature
in the ear**

Measuring the temperature in the ear

*The thermometer also allows you to
measure the temperature in the ear.
This is a convenient solution for
obtaining quick and reliable readings.*

Practical cover

The magnetic cover is an innovative solution that not only provides an easy change of measurement mode, but also protects the device from damage. It is a quick, simple and convenient function that makes using the Medic T08 even easier and more intuitive.

Audible signals

Neno Medic T08 thermometer informs you when the measurement is complete with a clear beep, and also warns you when the result indicates a fever. This allows you to take immediate action.

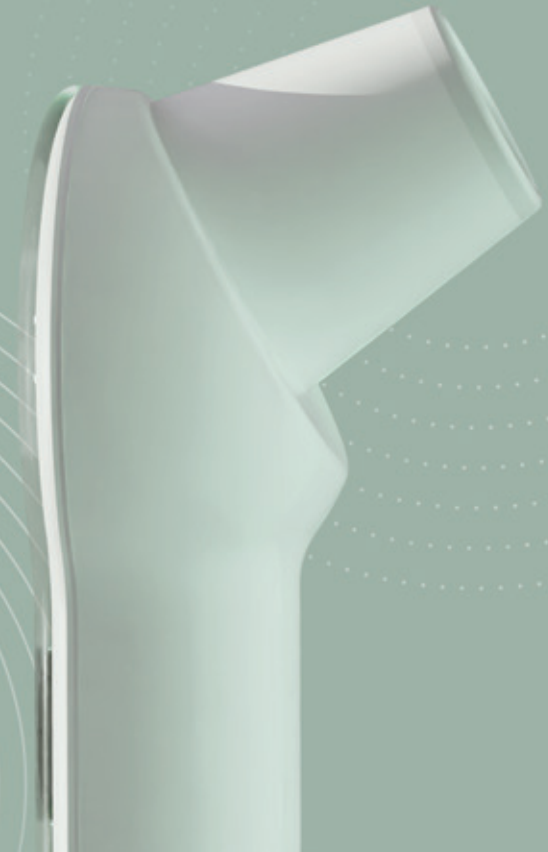

Always a reliable result

Medic T08 works equally well with toddlers and adults, providing reliable data in every situation. The temperature measurement is fast and extremely accurate. The result with an accuracy of 0.2°C appears after just 1 second.

Durable and ergonomic design

The product is made of high-quality materials.
It is lightweight, well shaped and very durable.

Thanks to its compact size, it will fit into
a first aid kit, bag or drawer.
