Intelligent baby monitor

When technology meets design, something special is created. The Neno Ami is an electronic baby monitor in the shape of an adorable teddy bear that puts you in full control of your little one's safety. With features such as sound detection, two-way communication, live monitoring and the ability to take photos and video, you can rest assured that your baby is safe, even when you're not around.

Swivel head 355° / 55°

With a helper like Ami Bear, you are always at the centre of things! Thanks to its rotating head (355° horizontally; 55° vertically), you have full control over what's happening in your child's room. Your little one's every move is monitored and you won't miss a single moment.

A close-up photograph of a baby sleeping peacefully in a crib. The baby is wearing a white long-sleeved shirt with gold buttons. To the right of the baby, a small, light blue robot toy with a black screen and gold accents is visible. The background shows the patterned bedding of the crib.

1080p

High resolution
4mpx

All in 4MPX – clear, sharp as ever! The Neno Ami delivers images of the highest quality. Every smile, every playtime, every sleep of your little one visible as if it were in the palm of your hand.

4 mpx

2.4GHz and 5GHz connectivity

The Neno Ami baby monitor supports 5GHz or 2.4GHz Wi-Fi.

So you can choose from the available networks in your home, and the great quality video will reach you without a moment's delay. Watch over your little one live, seeing every smile and every movement in real time, as if you were right next door.

In-app notifications

Your child's safety is a priority, which is why Neno Ami keeps a 24-hour vigil. Crying? Movement in the room? It will let you know immediately by sending you a notification from the TUYA app.

20°C

Measurement of humidity and temperature

The Neno Ami has a humidity sensor that allows you to control the conditions in your little one's room. Remember that the air should be neither too dry, so as not to irritate the respiratory tract, nor too humid, as it could encourage the formation of mould.

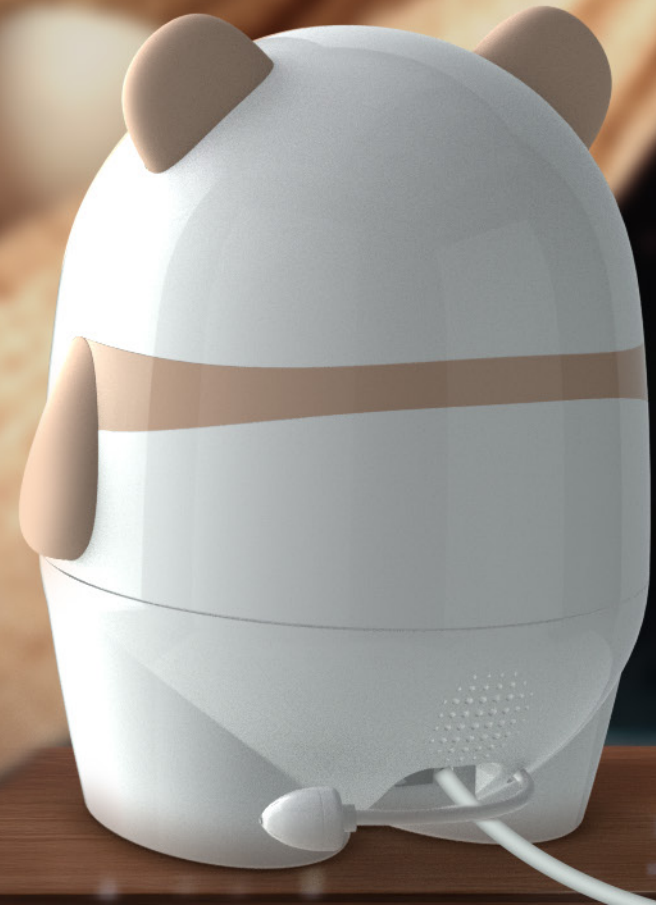

Two-way communication

Neno Ami allows you to speak to your little one even when you are in another room! With the two-way communication feature, you can soothe your baby when they wakes up, or simply feel that you are close no matter how far away you are.

Taking photos and videos

Want to capture every moment? With Neno Ami, it's easier than ever! Take photos or record a video to capture special moments, so your memories are always close at hand.

tuya[®]

Mobile application

*With the mobile app you have everything under control!
Monitor your little one live, switch on lullabies, check the temperature
and use many other functions via your smartphone.
Everything at your fingertips – simply and conveniently.*

*24/7 motion
tracking*

Neno Ami automatically detects your baby's movements and follows them by moving its head. This ensures that your little one is never out of sight. And thanks to motion tracking, the camera notifies you via the app when your little one moves.

Night mode

*The baby monitor provides a clear picture even in the dark.
The night mode ensures that your little one can sleep
soundly and you are still assured that everything is fine.*

*Place
it where
you want*

*Place the nanny anywhere
– on a desk, shelf or bookcase.
Ami's teddy bear will blend
in perfectly in any space.*

Sound detection

Crying, noise or other sounds in your baby's room? You will immediately receive an alert so that you can stay informed, no matter where you are.

Sound detection 12:40
Neno Ami sound detection

Support for micro SD cards up to 128 GB

Want to store your memories? The Neno Ami supports micro SD cards up to 128 GB, giving you plenty of space for photos, videos and recordings. All stored in one place and ready to be played back at any time.

Wide 120° viewing angle

With a 120° viewing angle, the Neno Ami provides a complete picture of the room. Your little one's entire room in your line of sight, without having to change the camera settings. You won't miss a thing – you're in full control of the situation!

Instant assembly

The Neno Ami Nanny can be fitted in a flash! Thanks to the headband, installation takes just a moment. With just a few moves, the baby monitor is ready to go without any complications.
