Silent mode

Professional temperature measurement

The Neno Medic T06 thermometer is a reliable companion for every parent - it provides an accurate temperature reading in just a few seconds. So you can be sure that every test is accurate and your baby is safe.

Infrared power

The Neno Medic T06 uses advanced infrared technology for non-contact measurement. This is perfect for young children who are often reluctant to use traditional methods such as taking temperature under the armpit or in the mouth.

under 12

Measurement for children and adults

The Neno Medic T06 was developed with the whole family in mind. Dedicated modes for children (up to 12 years) and adults allow you to change the settings with the touch of a button. Match the thermometer mode to the age of the user and enjoy the accuracy of the measurement.

Pay attention to the ambient temperature

Your baby's comfort is a priority. With the Neno Medic T06 thermometer, you can check the temperature of the environment, so you know that the conditions are adapted to your child's needs.

Object mode

Forehead temperature measurement

The forehead measurement is extremely comfortable and stress-free, especially for the little ones. The Neno Medic T06 is quick and painless, so even babies can feel comfortable during the test.

Measuring the temperature of food

The Neno Medic T06 thermometer helps to determine whether the food is at the correct temperature. This will help your little one to eat his or her meal in peace, avoiding scalding.

Object mode

Measure before bath

With the Neno thermometer you can create the perfect bathing conditions for your baby. It gives you a quick assessment of whether the water is warm enough.

Object mode

Memory for 20 results

The Neno Medic T06 stores up to 20 readings, so you can track temperature changes over time. This is particularly useful during periods of illness, when regular health monitoring is crucial.

Easy to read display

The Neno Medic T06 thermometer's clear and easy to read display makes reading the results simple and convenient. Whatever the time of day, you can get the information you need at a glance.

Correct measuring distance probe

A probe that checks the correct measuring distance indicates whether the measurement is taken at the correct distance.

Quiet temperature measurement

The Neno Medic T06 is ideal for taking measurements at night. By taking the temperature in silent mode, you can be sure you won't wake a sleeping baby.

Silent mode

Magnetic battery cover

Changing the batteries in the Neno Medic T06 thermometer is very easy thanks to the magnetic cover. This design allows the device to be fully functional again in a very short time.

*2 AAA batteries
included*

Intuitive operation

The Neno thermometer is very simple to use. The clear menus and function keys make it user-friendly for everyone.

*Measurement
mode for adults*

Practical case

The thermometer comes with a handy storage case, which is useful when travelling, walking and at the doctor's.

Minimalist design

The Neno Medic T06 thermometer has a sleek, minimalist design and an ergonomic, streamlined shape. Its original design makes it the perfect baby shower gift.
