We designed the
Freedom Series

especially for you so you can stop struggling
with the bottles. Stop and rest or do
something else while you are pumping.

Your hands will love it!

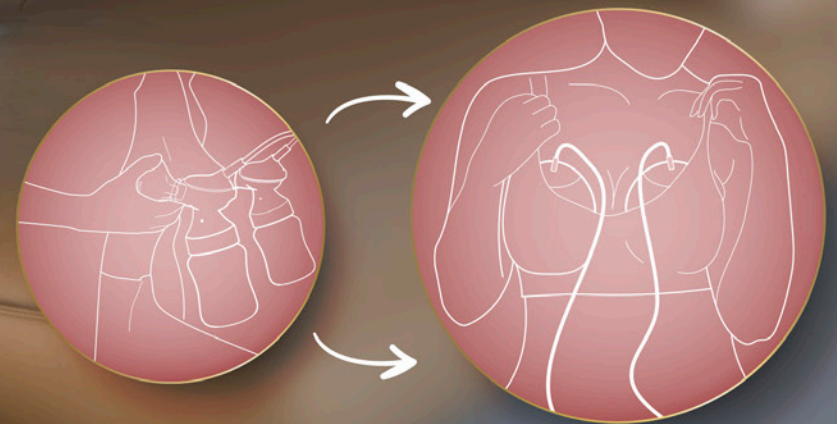

Freedom Series

Hands-free extraction

Want to get rid of unnecessary weight? Transform your breast pump! Ultralight, precision-shaped collection cups are an alternative to traditional bottles. They fit perfectly to the breast for comfortable, hands-free pumping.

Compatible with Neno breast pumps

Now you decide how to express! If you don't want to use a bottle, you can attach the practical cups that are compatible with the Neno breast pumps: Bella, Bella Twin, Bianco, Bueno, Camino, Due and Mare.

Neno Camino

Neno Bianco

Neno Bella

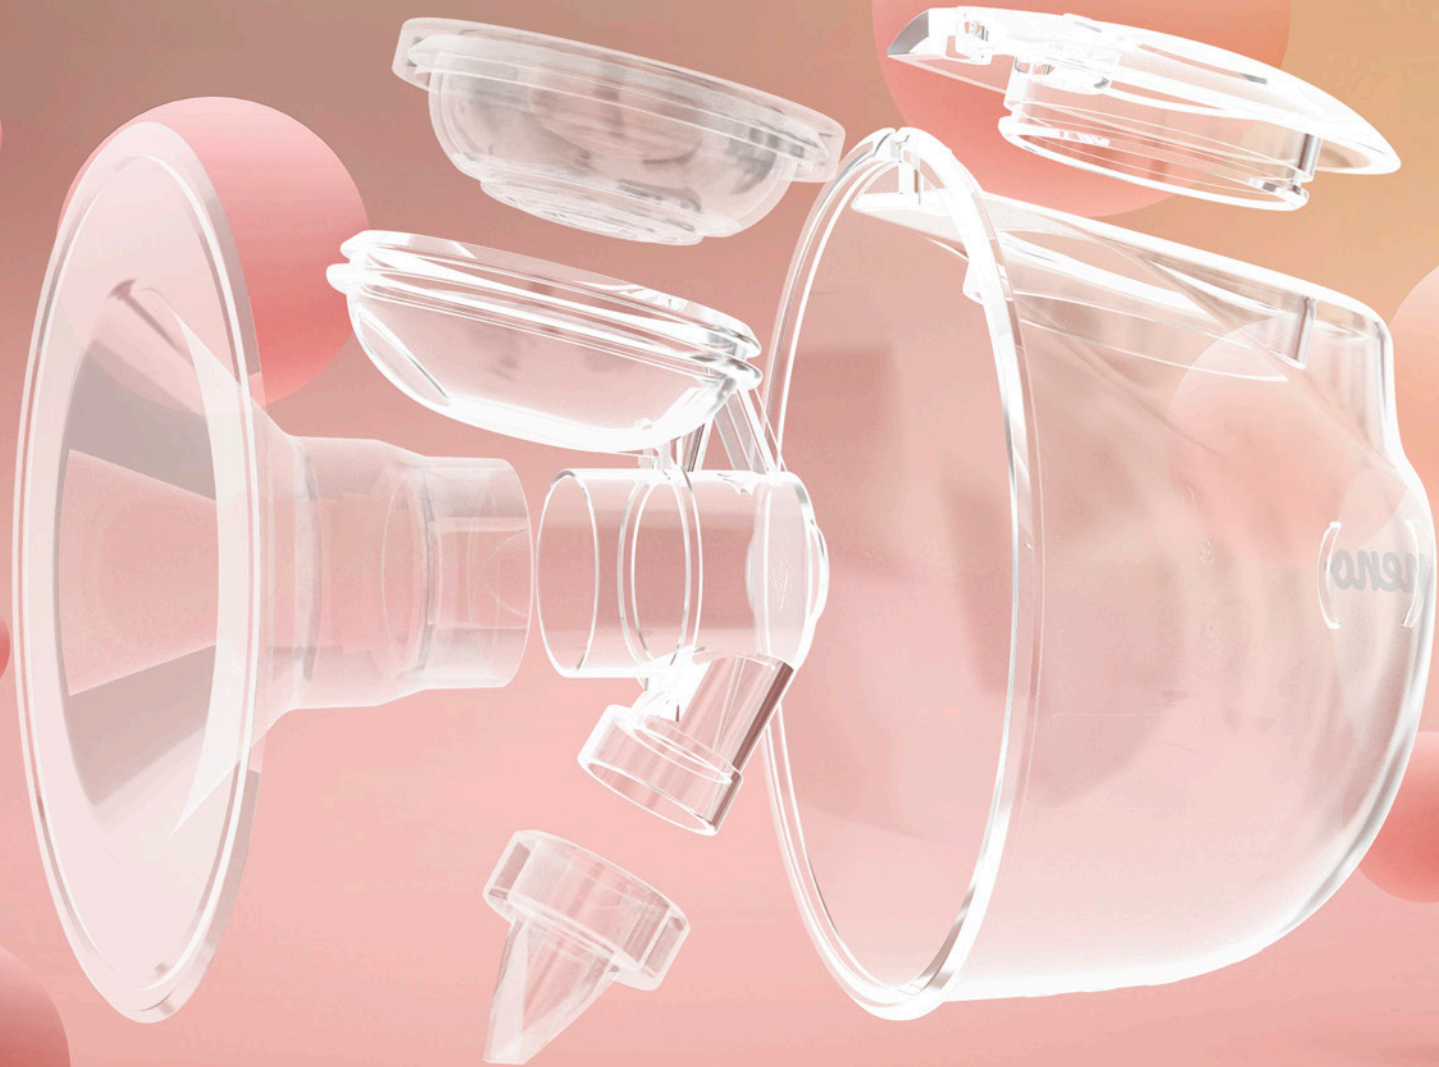

Neno Due

Neno Bella Twin

Neno Bueno

Closed system

Each cup has an innovative design with a closed system. This has a direct impact on hygiene and feed quality, as the milk enters the cup straight through the breast shield and does not back up into the pump and tubes.

Breast shield in sizes **4**

The cup kit is designed to be personalised. In addition to the collectors, the box contains three reducers that allow you to change the breast shield size to match your nipple circumference (17mm, 19mm and 21mm).

21mm

24mm
breast pump
shield

A close-up photograph of a person's hand with light-colored, manicured nails resting on the rim of a clear, cylindrical silicone breast shield. The shield is placed inside a clear plastic container. The background is a soft, out-of-focus pink fabric with a subtle pattern. The entire image is overlaid with a soft, golden bokeh light effect, giving it a gentle and delicate appearance.

All Neno accessories are made with love and attention to detail. The soft silicone breast shields are no different. The flexible material ensures that they fit snugly around the breast, are gentle and do not irritate the skin.

Soft silicone

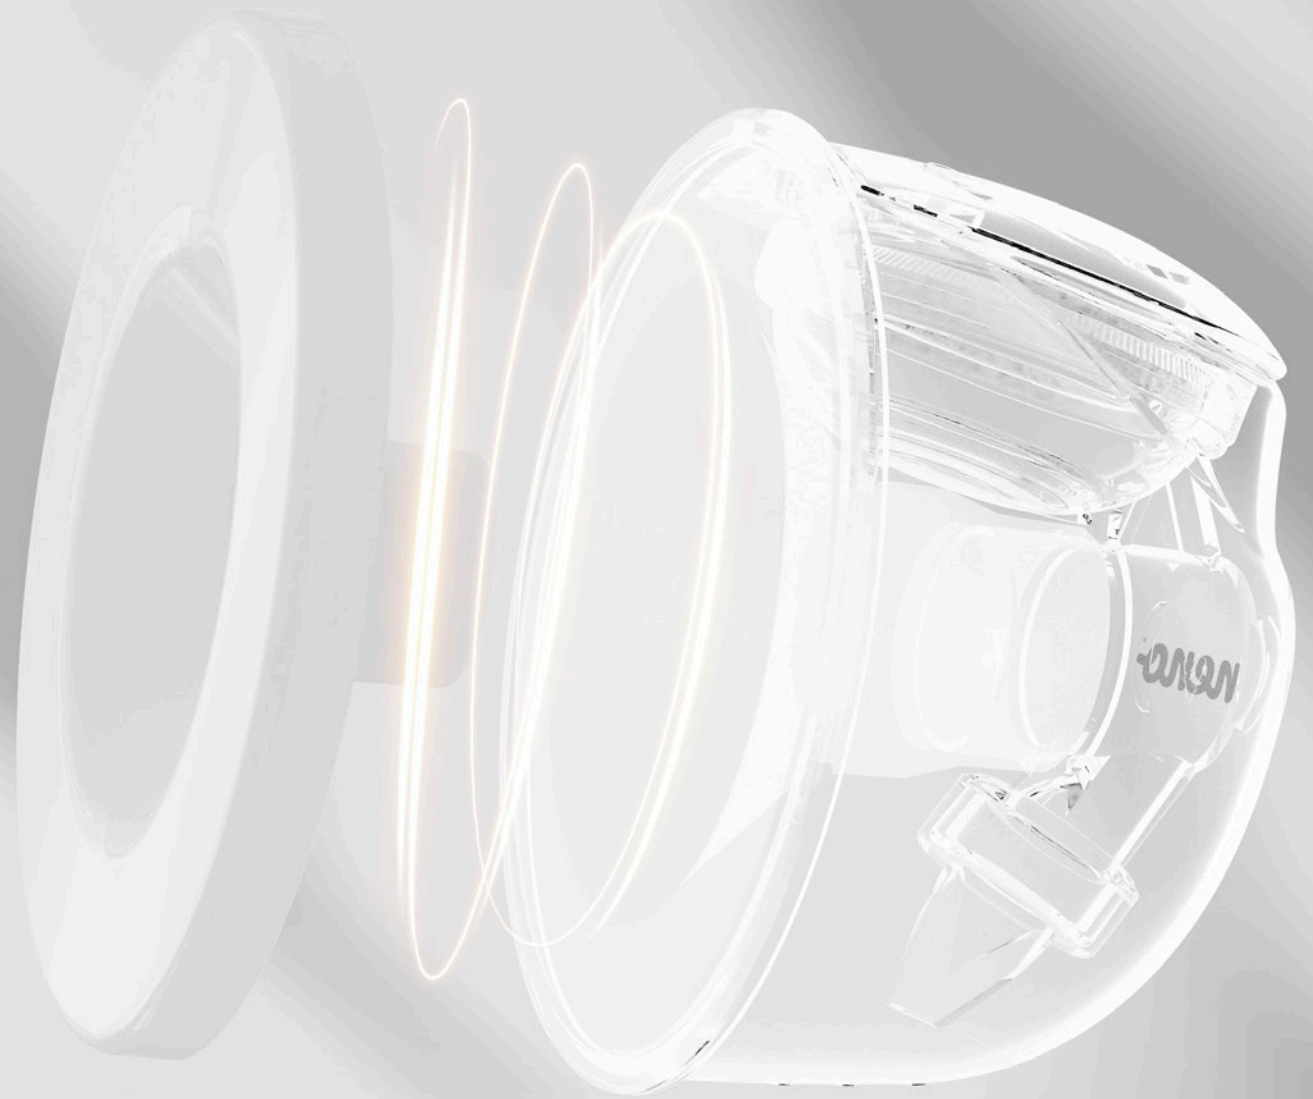

Ideal for the bra

How do you switch to hands-free mode? It's very simple. All you need for this is an elastic bra. The cups, due to their shape, adapt perfectly to the bra, so you don't have to worry about lack of comfort.

Breast shield lid

The breast shield lid is a practical and important part of the whole, made from high quality plastic. It is easy to handle and helps maintain complete hygiene of the parts that come into contact with the skin.

Easy pouring

Worried that giving up bottles for pumping will make feeding harder? Nothing could be further from the truth. In no time at all, you can pour the milk you have collected into the cup. Just tilt the container. That's it!

Light and comfortable

Cups are a practical choice for mums as they provide a balance between functionality and comfort. They are lighter and take up less space than bottles, so they are not a heavy burden when travelling.

Convenient sterilisation

Maintaining good cups hygiene is simple and intuitive. Just wash and disinfect the accessories regularly. Our tip? Soak them in boiling water for a few minutes or use the Neno steriliser of your choice.
