## Freedom Series

### **Hands-free breast pump series**

The Freedom Series is a range of innovative breast pumps designed to meet the needs of modern women. Lightweight and compact, these hands-free breast pumps allow each user to enjoy an unknown freedom when expressing milk. The hands-free formula frees not only the hands but also the mind of the mother, allowing her to have a moment to herself or focus on other tasks.

## *Mimics the suckling reflex*

The three-phase action system of the breast pump mimics the baby's natural sucking reflex. The initial, rapid pumping stimulates the milk flow to facilitate thorough, deep pumping in the next phase. An important part of the cycle is the third mode, which helps to stimulate lactation and unblock the milk ducts when milk is stagnant.

### Stimulation phase

Intense, fast pulsation to stimulate milk flow and mimic the natural sucking action of a baby.

### Deep extraction phase

Slower, deeper movements to express milk.

### Mixed phase

Mixed mode effectively stimulates milk production; using the breast pump in phase III is particularly helpful in cases of stasis.

## *Advanced lactation support*

The Neno Sole breast pump provides professional help for mothers who need extra support to induce lactation after a caesarean section. By closely mimicking the natural sucking reflex, the body receives the right stimulation to directly stimulate milk production.

# *Gentle breast shield material*

The breast shield is made of soft silicone and fits snugly against the breast. The soft material does not irritate the sensitive nipple area or cause soreness.

## *Simple control panel*

A touch-sensitive, intuitive control panel with digital display provides access to all device functions.

# *Comfortable to use*

The modern formula of the breast pump allows you to better organise your daily activities. You don't have to use your hands while pumping, so you can spend more time with your baby.

nenor PREMIUM

# *High quality manufacturing*

The components of the breast pump have been designed with attention to detail. The well thought-out design follows the anatomy of the female breast for a perfect fit.

# *USB-C cable included*

The included USB-C cable allows you to charge the breast pump quickly and conveniently.

**nenor** PREMIUM

# *Light and handy*

The Neno Sole breast pump fits into the cup of your bra. It is handy and compact so you can take it with you wherever you go.

# *Quick milk transfer*

The milk collected in the Neno Sole can be transferred quickly to a bottle.

# Convenient sterilisation

Regular sterilisation of the parts that come into contact with your milk is an important aspect of using your breast pump. Each part can be sterilised in a water bath or in one of the Neno sterilisers.

# *Efficient operation*

The breast pump is equipped with a battery that ensures high performance. It can run for up to 150 minutes on a single charge.

# *Bra compatible*

The hands-free breast pump can go with you in a variety of situations. Thanks to its shell design, it fits perfectly in the cup of a flexible bra.

# *Velvet pouch*

The attractive velour pouch makes it easy to carry and protects it from damage. Ideal for daily walks and longer journeys.

# Complete kit

The kit contains all the parts you need for the breast pump to work properly.

# *Cup of 210 ml*

The Neno Sole can express up to 210 ml of milk at a time. This allows you to express milk effectively in less time.

**neno** PREMIUM

## *Choose the size*

In order to express breastmilk correctly, the first step is to choose the right size of breast shield.

With the reducer supplied, you can change the size from 24 mm to 20 mm if necessary.

## *Quick cleaning*

Cleaning the breast pump takes very little time. Simply take it apart and wash the parts that come into contact with milk under running water.

# *The perfect baby shower gift*

nenob PREMIUM

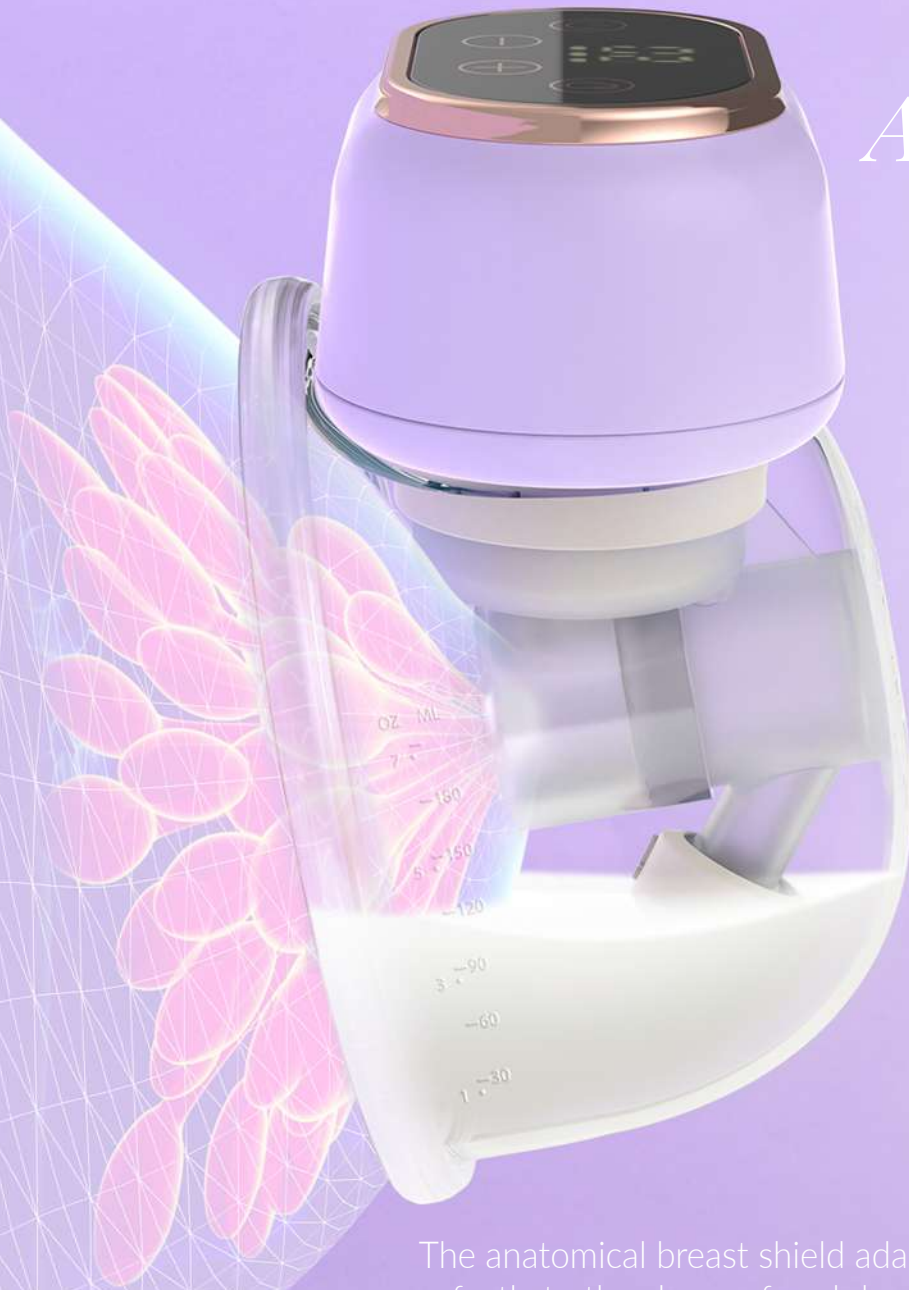

The pastel-coloured breast pump with the innovative hands-free formula makes the perfect baby shower present for mums-to-be.

# *Closed system design*

The closed system design means you can express milk hygienically and safely. You can be sure that no harmful bacteria will get into the milk.

# *Anatomical breast shield*

*Breast shield  
24 mm*

*Breast shield  
reductor 20 mm*

The anatomical breast shield adapts perfectly to the shape of each breast without exerting too much pressure. It provides a very good seal, which results in increased expressing efficiency.
