electronic breast pump

Luxury

neno® Freedom Series

The revolutionary line of hands-free breast pumps

Hands-free breast pumps are the ideal solution for mums who value freedom and want more time to themselves. Thanks to the innovative shell design, the breast pump allows you to express milk from both breasts simultaneously, hands-free. Give your hands a rest while pumping with the hands free breast pump range. Let yourself be comfortable.

The natural pumping rhythm

Neno Sole Twin works in three phases that exactly replicate the natural sucking of the baby. First, rapid pumping stimulates the flow of milk, followed by a deep extraction phase. In the third phase, the device helps to kick-start lactation and relieve pain during milk stasis.

Stimulation phase

Rapid pumping that activates the flow of milk.

Deep extraction phase

Slow and precise movements ensure effective extraction.

Mixed phase

Stimulates milk production, ideal during problems with straining and stagnant milk.

nenob PREMIUM

Lactation support after caesarean section

For mums who need extra stimulation after a caesarean section, the Neno Sole Twin is the perfect solution. By mimicking natural sucking movements, it effectively supports milk production and the entire lactation process.

Soft and fitted breast shield

The breast shield, made of soft silicone, fits perfectly to the breast, protecting the delicate skin from irritation.

Touch panel

The touchscreen control panel with display is simple and intuitive, allowing you to quickly set the appropriate operating parameters for the breast pump.

Everyday convenience

The modern design of the Neno Sole Twin allows you to combine expressing milk with your daily chores, so you can make time for other activities.

nenor PREMIUM

Attention to detail

Every element of the breast pump has been designed with the female anatomy in mind, ensuring effective milk extraction and maximum comfort.

USB-C cable

With the included USB-C cable, charging the breast pump is quick and convenient.

nenor PREMIUM

Handy and compact

Neno Sole Twin is small enough to fit easily into the cup of a bra. This makes it an indispensable companion in the everyday life of a breastfeeding mum.

Easy milk transfer

After each pumping session, you can conveniently transfer the collected milk into a bottle and then give it to your little one.

Hygiene and sterilisation

Taking care of the hygiene of the parts of the breast pump that come into contact with the milk is very important. You can conveniently sterilise them in water or with one of the Neno sterilisers.

нено PREMIUM

nenor PREMIUM

*Excellent
performance*

The breast pump is equipped with a powerful battery that allows it to run for up to 150 minutes on a full charge.

Bra fit

Collection cup is held securely in the cup of a flexible bra, guaranteeing complete freedom of movement and a very good fit.

Stylish pouch

Velour pouch allows you to carry the breast pump comfortably and protects it from damage. It's perfect for both everyday outings and longer journeys.

Large collection cups

Each collection cup of the Neno Sole Twin breast pump can collect a large amount of breastmilk – 210 ml. That's up to 60 ml more than a standard feeding bottle can hold!

neno PREMIUM

Adjusting the breast shield size

Did you know that you can easily
adjust the breast pump breast
shield to suit your needs?
It comes with a reducer that
reduces the size from 24 mm to
20 mm.

Express cleaning

The breast pump can be cleaned in the blink of an eye. Simply disassemble the device and rinse its parts with water.

The perfect gift for a mum-to-be

nenobaby PREMIUM

The pastel breast pump with its innovative design is the perfect choice for a baby shower gift that is sure to delight the mum-to-be.

Hygienic milk extraction

nenor PREMIUM

The closed system of the breast pump ensures that pumping is carried out in a safe and hygienic way, effectively eliminating the risk of milk contamination.

Anatomical fit

lejek 24 mm

*reduktor lejka
20 mm*

The breast pump breast shield adapts perfectly to the shape of the breast. This ensures an effective seal and improves pumping performance.
