connector

1x

breast shield 21 mm

2x

membrane

Dear Mom!

Every moment of rest or time spent with your child is precious. That's why it's not worth wasting time on tasks that can be handled by a device designed especially for you. At Neno, our mission is to provide real support to every mom during this beautiful yet challenging time. That's why our electric breast pumps, aspirators, nebulizers, baby monitors, thermal bowls, toothbrushes, and other Neno products help make everyday life easier and more enjoyable for both parents and little ones.

A photograph of a woman with long dark hair, wearing a white tank top, smiling and holding a baby. The baby is wearing a white onesie. The image is partially obscured by a large pink circular graphic on the left and a green circular graphic on the bottom right.

Compatible with Neno bottle breast pumps

The Neno product range meets all the needs of breastfeeding moms. To ensure full hygiene and safety while expressing milk, it's important to regularly check the condition of the membrane, valves, flanges, and tubing. Our spare parts set is compatible with Neno bottle breast pumps, and replacing them is very easy. Remember to sterilize the components that come into contact with milk after each pumping session.

21 mm

Breast pump breast shield

The silicone replacement breast shield for Neno breast pumps ensures maximum comfort and convenience while allowing proper milk flow during pumping. The 21 mm breast shield, designed for nipple diameters between 17 and 18 mm, is perfect for travel or situations where washing the pump after each use is not possible. Our breast shields are completely safe, BPA-free, and ideal for every mom.

**ORIGINAL PATTERN
FOR BREAST SHIELD**

Valve

The replacement valve for Neno breast pumps ensures that milk flows in the right direction during pumping, guaranteeing efficient milk expression while maintaining the suction power of the device. Replacing this part ensures the proper functioning of the breast pump in every situation.

Connector

The spare connector is compatible with Neno bottle breast pumps. It is made of high-quality, durable materials that are safe for health. Its role is to provide a secure connection between the bottle and the breast shield. Inside the connector, there is also space for the membrane and valve.

Membrane

The replacement membrane for Neno breast pumps is made entirely of silicone and contains no BPA. It prevents milk and moisture from entering the tubing, ensuring hygienic milk expression. Additionally, Neno membranes feature a special system that prevents air from mixing between the tubes and the expressed milk while the breast pump is in use.

neno®

Under care

Neno is the most recommended brand by moms, midwives, and lactation consultants. Our products are designed for new parents to make everyday life easier and allow them to enjoy every moment with their little one.

A woman with long dark hair, wearing a light-colored spaghetti strap top, is sitting on a bed and breastfeeding her baby. The baby is wearing a white onesie with lace trim. The background is a softly lit room with a white brick wall and a white shelf with books. The overall tone is warm and intimate.

Lactation consultant

Breastfeeding, although the most natural thing in the world, does not always come easily. Both experienced midwives and lactation consultants know that choosing the right breast pump is essential for smooth, healthy, and hassle-free milk expression.
