Go wireless

Forget the clutter of cables and restrictions! The Neno Vapore is a wireless nebuliser that gives you total freedom. You can use it anywhere – at home, on a walk or on the move.

For newborns

The Neno Vapore is ideal for newborn babies. Mum can comfortably hold the nebuliser over her baby's face and gently move it to her mouth. It is a safe and effective solution that does not require the device to be placed over the child's face.

Medical device

As a certified medical device, the nebuliser meets the highest quality standards. This gives you the peace of mind that every nebulisation is not only effective, but also safe for you and your family.

3 masks and mouthpiece

The Neno Vapore is equipped with three masks of different sizes: for newborns, children and adults. This ensures that anyone of any age can benefit from the device. A mouthpiece is also included for more effective nebulisation.

adults

molecules
MMAD
 <5
 μm

The effectiveness of inhalation depends on the particle size of the drug. Neno Vapore produces particles with an MMAD of $<5\mu\text{m}$ so that the drug reaches deep into the lower airways.

The image is a split-panel advertisement. The left panel shows a young girl with blonde hair, wearing a white lab coat over a blue shirt, using a nebulizer with a clear plastic mask over her nose and mouth. A fine mist is visible coming from the device. The right panel shows a man with a beard and glasses, wearing a dark suit and light blue shirt, using a nebulizer with a mouthpiece. He is holding the device in his right hand and has his left hand on his throat, appearing to be in discomfort. A fine mist is also visible from his device. The background is a soft-focus indoor setting.

Two types of nebulisation

The inhaler allows you to nebulise in two ways (using a mask or mouthpiece), giving you the freedom to tailor your therapy to your personal needs. This choice allows you to fit your therapy around your lifestyle.

For the whole family

The Neno Vapore is a nebuliser designed for the whole family. Its simple operation makes it easy to use for young and old alike.

fast

medium

slow

3

speed modes

Three levels of mist output are available during nebulisation. By selecting one of these, you maximise the therapeutic potential of the device.

Silent operation

The Neno Vapore works extremely quietly, so that inhaling at night will not disturb the sleep of the rest of the household. It is the perfect solution for those who value peace and quiet.

Large medication container

Thanks to the 6 ml medication container, nebulisation can be carried out without frequent refilling. This saves time and ensures continuity of therapy.

6 ml

USB charging

The included cable makes it easy to charge the Neno Vapere wherever you are.

Light and mobile

Neno Vapore is a synonym for mobility. It's light, compact and portable. Throw it in your bag and have it handy!

Ideal for travelling

The Neno Vapore is an invaluable aid when travelling. It comes with a handy case for safe storage and transport in a suitcase or backpack.

Complete set

In addition to the nebuliser itself, you will receive three masks in different sizes, a mouthpiece and other accessories such as rubber bands for holding the mask and a USB cable.
