## Neno Freedom Series

*The Freedom Series range has been designed for the confident and independent mum who knows exactly what she wants. It includes modern, portable breast pumps that allow you to pump hands-free. The hands-free formula leaves your hands free to do other things.*

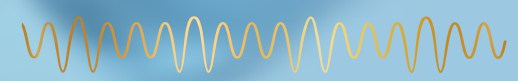

The Neno Velo gives professional support to mothers who need extra help with breastfeeding after a caesarean section. Thanks to its three-phase technology, the device closely mimics the baby's suckling rhythm, providing the necessary stimulation to support milk production.

# Mimics your baby's suckling rhythm

The way the Neno Velo works is based on an advanced three-phase system that mimics your baby's suckling rhythm. In the first phase, rapid pumping stimulates milk flow, allowing the pump to extract milk from the breast slowly and precisely. Using the breast pump in the third phase helps to kick-start lactation and minimises the risk of stasis.

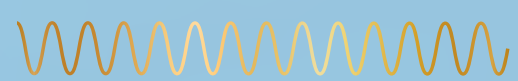

### *I phase - stimulation*

High intensity rapid pulsation to stimulate milk flow and mimic the baby's natural suckling pattern.

### *II phase - deep expression*

Deep pumping mode – a quieter but equally effective pumping action to help draw milk from the breast.

### *III phase - mixed*

An innovative phase that stimulates lactation and helps to empty the breast at the same time; using the breast pump in this mode is particularly helpful when there is a low milk supply.

## *Personalised expression of breastmilk*

When pumping, you have full control of the suction power in a range of 8 levels. Finding the right setting ensures comfort and reduces the risk of pain and irritation. What's more, the breast pump allows you to express from one breast only. Simply plug one of the openings with the silicone plug.

## *Ergonomic breast shield*

Neno Velo's anatomical breast shields naturally conform to the unique shape of each breast. Each one provides a good seal without pressing the areola too hard against the nipple, which results in increased expression of milk.

*24 mm*

*20 mm*

## *Breast shield size adjustment*

The correct fit of the breast shield has a direct effect on the effectiveness of expressing milk. If the breast shield does not fit snugly against the breast, you can adjust it by reducing the size from 24 mm to 20 mm using a reducer.

# *Instant cleaning*

The breast pump collection cups can be cleaned quickly and easily with water and a mild detergent. Thanks to their simple design, they can be disassembled in just a few seconds.

# *Closed milk cycle*

Each cup in the Neno Velo breast pump has a closed system. The specially designed construction ensures that the milk circulates properly and hygienically. This solution ensures that the milk is not contaminated by harmful micro-organisms.

## *Quick sterilisation*

All parts that come into contact with milk must be sterilised regularly. The quickest way is to use a so-called water bath or one of the reliable Neno sterilisers.

## *Intuitive touch panel*

Neno Velo is equipped with a clear touch panel with a digital display that gives you access to all the functions of the breast pump.

## *Silent operation*

The silent operation of the device allows you to express milk in public places without undue stress. This is also important during night-time pumping sessions when everyone in the house is asleep.

nenov PREMIUM

## *Two lanyards*

The Neno Velo hands-free breastpump has been designed to give you comfort and independence. The lanyards supplied

allow you to pump hands-free. Silicone accessories allow you to hang it around your neck or on your belt.

## *USB-C charging*

The breast pump's battery is charged via a universal USB-C port, so you can use it anywhere, anytime.

# Compact design

The handy pump is small enough to fit in a backpack or handbag. Combined with the lightweight cups, it forms a set that is ideal for carrying in a stylish velour pouch.

neno PREMIUM

## *Powerful battery*

The Neno Velo breast pump is equipped with a high-capacity battery for long-lasting operation without the need for frequent recharging. It is perfect for travelling and for everyday use, and guarantees you uninterrupted operation and reliability.

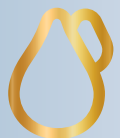

## *Display with timer*

The timer makes it much easier to monitor the expressing time. You will always know exactly how far along you are.

To unlock the screen, simply press the lock/mode button for 2 seconds.

## *Automatic panel lock*

At the end of a session or after 20 seconds of inactivity, the panel locks automatically to prevent accidental changes to settings. To unlock the screen, simply press and hold the lock/mode change button for 2 seconds.

## *Collection cups of 180 ml*

You can express up to 360ml of breastmilk at a time with the 180ml capacity of each cup. This is an excellent choice for mums who value their time. The Neno Velo is also a great choice for mums who are expecting twins. It will also work well for women using the KPI method who need to express milk frequently.

## *Easy milk transfer*

The milk collected in the cups can be transferred to the bottle in a hygienic and easy way.

## *Functional design*

The Neno Velo breast pump is designed to meet the needs of modern mothers. Features such as the ability to attach a neck strap, the digital timer and the closed system increase comfort and safety during daily use.

## *Easy storage*

The included velvet pouch makes it easy to store in a handbag, rucksack or suitcase.

## *Perfect gift*

The double hands-free breast pump makes a lovely gift for any mother-to-be. Its exclusive packaging makes it the perfect baby shower present.

## TECHNICAL DATA:

Model:	Neno Velo
Operating modes:	Stimulation mode: L1-L8 Deep expression mode: L1-L8 Mixed mode: L1-L8
Milk container capacity:	2x180 ml
Battery:	rechargeable Li-Po 3.7V 2000 mAh
Charging time:	approx. 3 hours
Working time:	up to 105 minutes
Input:	5V 2A
Charging cable:	USB-C
Length of leash:	42cm and 15cm
Pump size:	12x7x4cm
Pump weight:	236g
EAN:	5902479674742
Box size:	280x270x120mm
Box weight:	1400g
PN:	NEN-MAM-LK018
Box contains:	Pumping station • 2x Silicone breast shield 24mm • 2x Breast shield reductor 20mm • 4x Membrane • 4x Valve • 2x Milk container 180ml • 2x Breast pump connector • 2x Connecting tube • 2x Silicone leash • 2x Membrane cover • Manual • USB-C cable • Velvet bag
