camera resolution

Pan&tilt head

The Neno Ivo electronic baby monitor has a rotating head that allows you to monitor your baby's room completely. As it rotates 355 degrees horizontally and 55 degrees vertically, you will never miss a thing. This comes in handy when your little one starts crawling and exploring the world around them.

FULL HD

Camera resolution

Full HD resolution gives you crystal clear images. You can see every detail – from your baby's smile to the slightest movement. This makes it easier to spot any changes in your little one's behaviour and react quickly if necessary.

5-inch display

For ease of use, the wireless receiver has a large 5" display. The large screen allows you to comfortably watch your baby without straining your eyes.

8 pre-programmed lullabies

The baby monitor has 8 pre-programmed lullabies to calm and relax a baby. The lullaby melodies create a peaceful atmosphere to help your child fall asleep.

Automatic night mode

With automatic night mode, the camera adjusts to the lighting conditions for clear images even in the dark.

Motion and sound detection

The baby monitor features motion and sound detection. If your baby moves or cries, the device sends an instant alert. Ideal if you want to know if the little one is safe when you are in another room.

Monitor

with receiver or smartphone

With the Neno Ivo baby monitor, you can use both the receiver and your mobile phone. Integration with the TUYA app gives you a live view wherever you are.

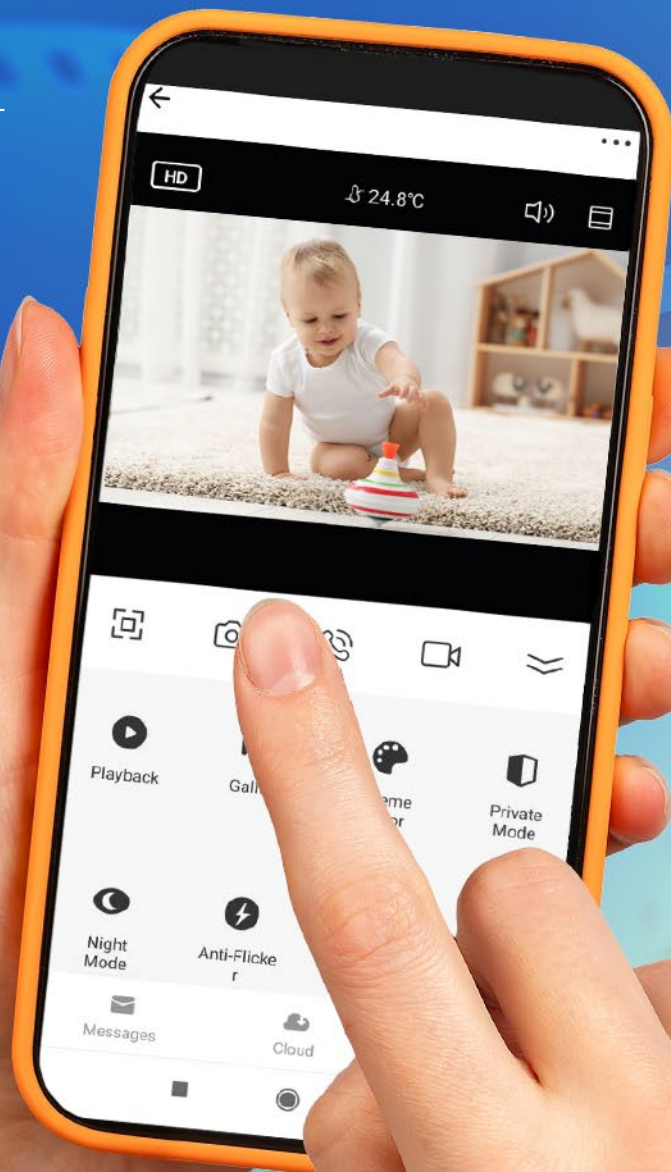

Mobile application

The baby monitor can also be managed via the TUYA app installed on your smartphone. You can adjust camera settings, play lullabies and even check the temperature and humidity in your baby's room.

Capture the moment

Use the TUYA app to store photos and videos on your memory card. This is a great way to preserve memories for longer and share them with family and friends.

Two-way communication

Do you want to stay connected? Two-way communication lets you talk to the child even if you are in another room. You can use your voice to reassure baby and provide a sense of security and closeness.

Long range

With a range of up to 500 metres outdoors and up to 100 metres indoors, you can move around the house and garden without losing contact with the baby.

4x zoom

The 4x zoom on the Neno Ivo baby monitor helps parents keep an eye on their children from a distance.

*Ensure
optimal conditions*

24.5°C

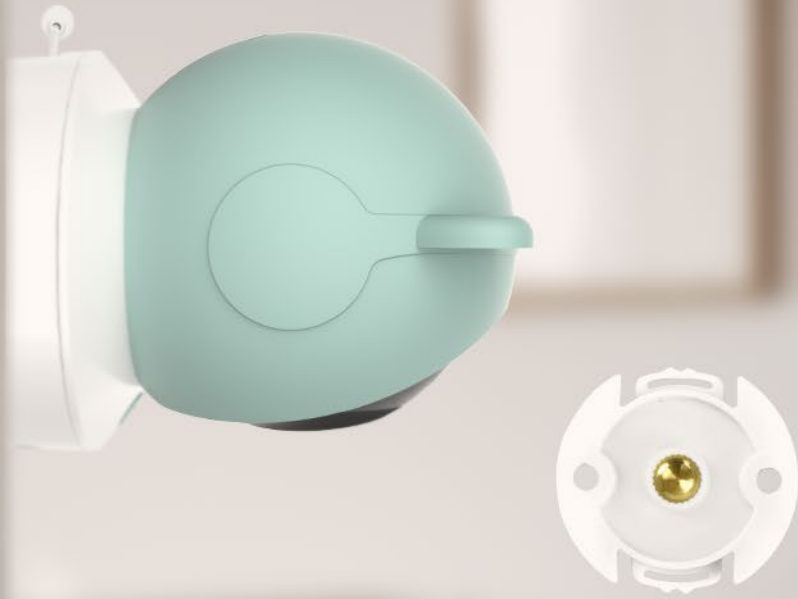

Controlling the temperature and humidity in your child's room helps to create the ideal conditions for sleeping and playing. In this way, you can rest assured that your little one is always in a comfortable and safe environment.

Alarm setting

This feature allows you to set alarms for a specific time. This ensures that you are always aware of key points in your child's schedule, such as nap or feeding time.

Benefit in 3 ways

How can you use it?

- Put it on the table.
- By attaching it to a flexible rod (e.g. to the rungs or railing of the cot).
- By fixing it to the wall using the accessories supplied.

Design and functionality

As well as its functionality, Neno Ivo has an elegant design that blends in perfectly with the décor of any baby's room. The modern design and compact dimensions make the baby monitor not only practical, but also aesthetically pleasing.

Flexible mounting

The holder provides easy and stable attachment to a variety of surfaces. Its flexibility allows you to bend it to get the best viewing angle.

Baby shower gift

The modern design and high quality workmanship of the baby monitor are impressive. It is packaged in a stylish, aesthetically pleasing box with subtle embellishments, making it an ideal baby shower gift.
