Vox standby mode

Two-way communication

Imagine being able to soothe your baby with your voice while you are in another room. The two-way communication feature makes it possible! Now you can sing lullabies, say affectionate words and stay close to your little one.

Temperature monitoring

Did you know that the perfect temperature in your baby's room is the key to a good night's sleep? The Neno Bambino has a built-in temperature sensor that continuously monitors the room conditions.

Night mode

You no longer have to worry about what happens in your child's room after dark. The Neno Bambino is equipped with automatic IR LEDs that provide excellent visibility even in total darkness. Night mode works up to 5 metres and the LEDs are invisible to the eye, so your little one can sleep peacefully while you keep an eye on things.

Alarm function

The Neno Bambino
baby monitor is a real helper! The alarm
function reminds you of feedings, naps or medication.

6 pre-programmed lullabies

Time for a nap? At the touch of a button, a gentle melody plays in the room to soothe the baby and ensure a peaceful night's sleep.

Wide operating range

With the Neno Bambino you can monitor a child from anywhere in your home and garden. The range of up to 300 metres outdoors and 50 metres indoors gives you complete freedom of movement.

x4

4x zoom

Want to see exactly what your baby is doing? The baby monitor has a 4x zoom so you can get a closer look at your little one without having to go into their room.

Flexible holder

The long, strong and flexible holder ensures a stable and comfortable fit. It allows you to easily adjust the position of the device so that you always have a perfect view of your child.

VOX *standby mode*

Save energy and stay connected with VOX standby mode. The monitor automatically turns on when it detects sound, so you can use it for longer without having to keep recharging.

Large screen

A big advantage of the device is the receiver, which has a large, easy-to-read screen so you can keep an eye on your baby at all times.

on the wall

on the baby cot

3 ways to use

You can use the baby monitor in 3 different ways. Place it on a flat surface, attach it to a cot rail or mount it on the wall using the flexible bracket or accessory kit.
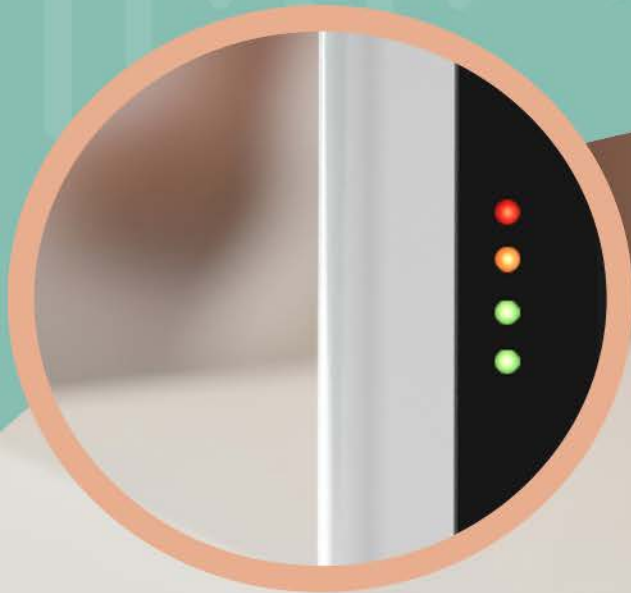

on the table

Wireless receiver

Get the comfort you need! The Neno Bambino wireless receiver allows you to move freely around your home without worrying about cables and sockets.

Sound detection

A modern sound detection system enables the baby monitor to react quickly to the child's needs. Parents can be sure that no important signal is missed.

Pairing capability

Want to monitor more than one room? Now it's possible! You can pair the Neno Bambino baby monitor with an additional camera (up to 4 cameras).

Baby design

Looking for an addition to the baby's room or a baby shower gift? Choose the Neno Bambino baby monitor - an adorable accessory that blends in perfectly with a child's room.
