Freedom Series

Three-phase hands free
electronic breast pump

Luxury

neno® Freedom Series

The Freedom Series breast pumps are designed for women who value convenience and independence above all else. Lightweight and portable, they change the face of breast pumping by being hands-free. This allows any mother to use her hands for other activities while expressing breast milk for her baby.

Pearl in Neno's crown

The elegant Perla is the first such breast pump in the Neno range. It combines an innovative hands-free formula with the functionality of a classic bottle pump. This brings a whole new dimension to everyday breastfeeding.

Neno Perla

SUPPORT FOR
MAINTAINING
lactation

Three modes of operation

You can use the breast pump in three modes. In each of them, you can adjust the suction power in a range of 9 levels.

Stimulation phase

Fast, intense pulsation. Stimulates milk flow. The breast pump reproduces the baby's natural sucking action.

Deep extraction phase

Gentle pumping to express milk from the breast.

Mixed phase

An innovative phase that has a direct effect on stimulating lactation and helps with complex breast emptying and lack of milk.

Lactation support

Did you know that you should express breastmilk every few hours on average when you are lactating? With Perla, you don't have to think about it all the time. Just place it in the cup of your bra and do something else.

In the meantime, the breast pump will do its job!

105° breast shield

Perfectly Shaped+ is a breast shield designed to optimise the pumping process. Its unique curved angle of 105° not only ensures a perfect fit to the shape of the breast, but also allows natural and free nipple movement. This improves milk flow and minimises the risk of milk stasis or clogged milk ducts.

105°

Select breast shield size

Included with the Neno Perla, you will receive a standard size 26 mm breast shield, as well as reducers to reduce the size to 19 mm and 22 mm. This solution means that you will adapt the device to your individual needs, ensuring your comfort.

YOU DECIDE

Smart, safe design

The clever structure of the breast pump helps to keep the intake fresh. Why? Because the pumping process has been optimised so that the milk goes directly into the container. This eliminates the risk of potential contamination by harmful microorganisms, which is particularly important for the health of your baby.

Practical container

Don't worry if you need to express your breastmilk but don't have a bottle or pouch with you. The breast pump container with lid can also be used for storage.

nenō PREMIUM

Simple function panel

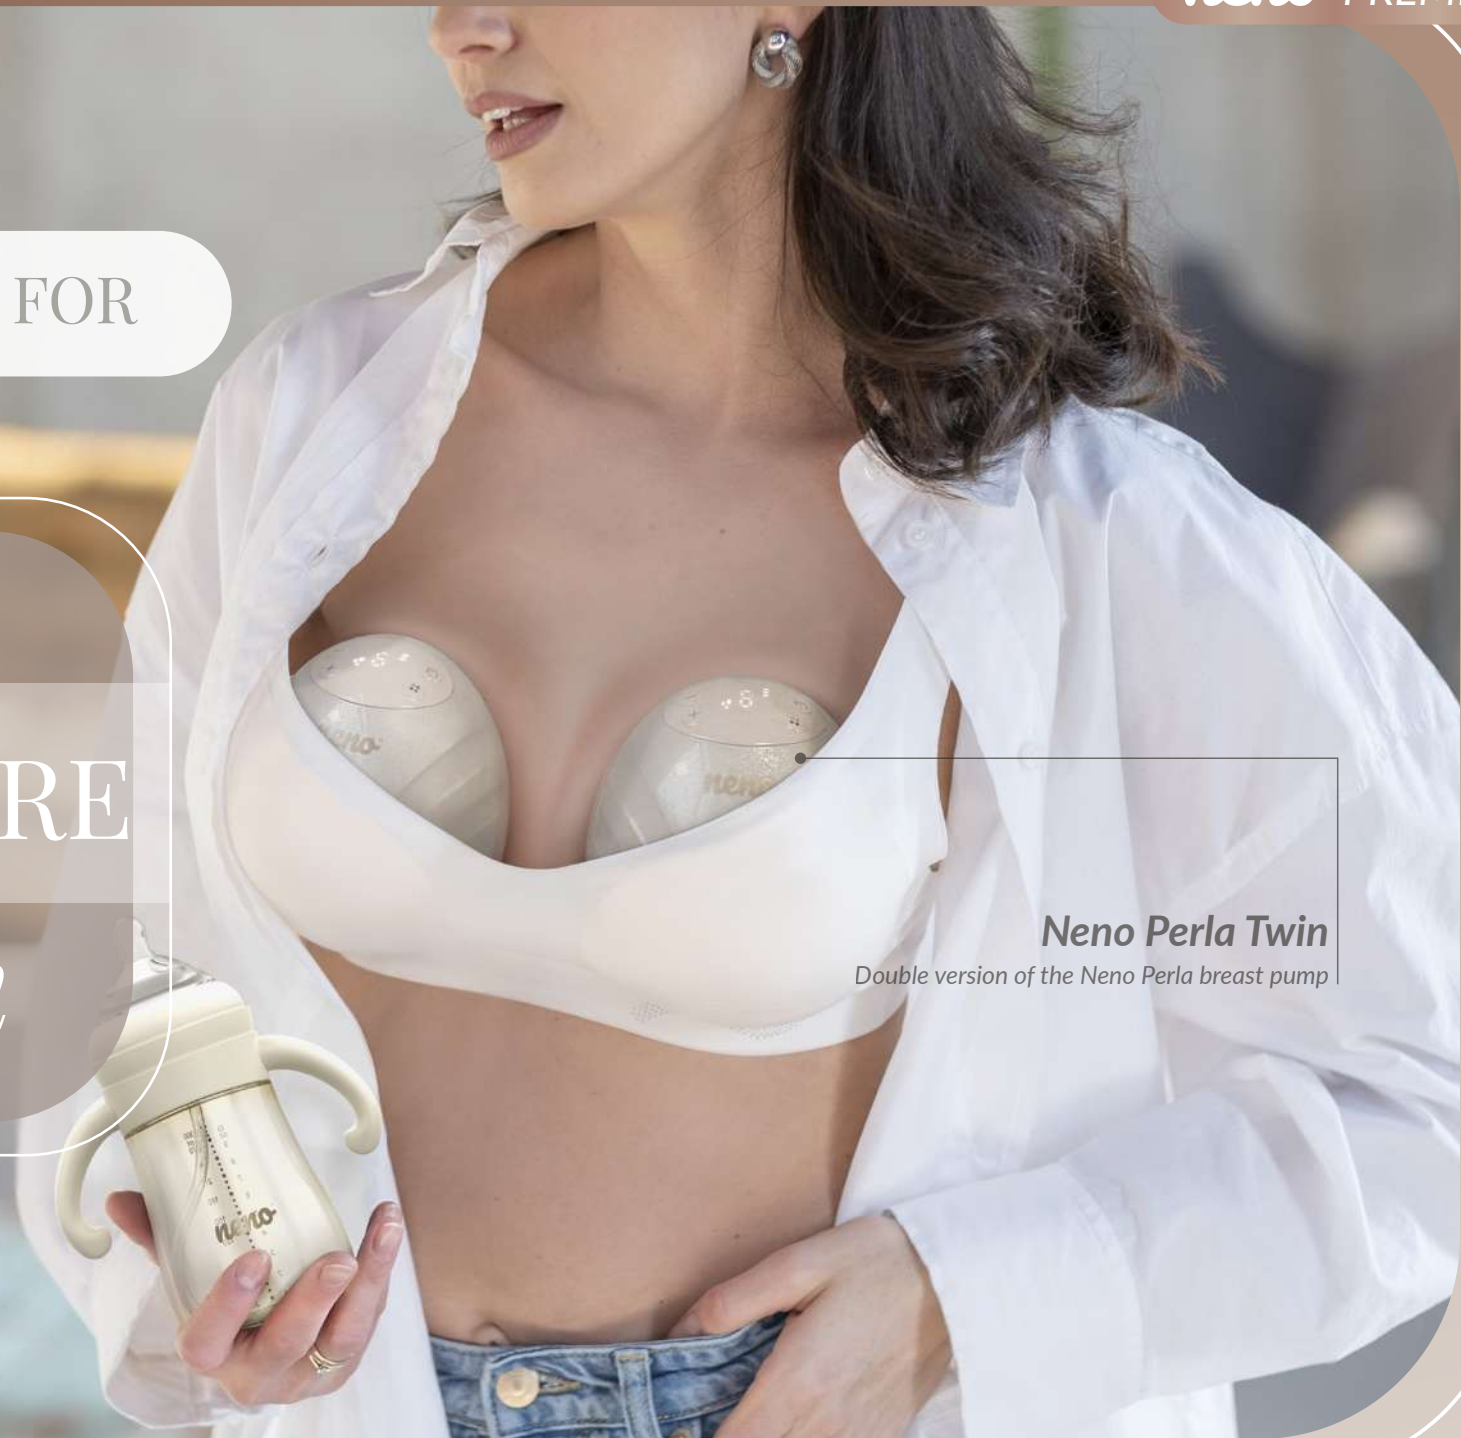

The Neno Perla breast pump touchpad provides comfortable and intuitive operation. You can easily select modes and adjust the suction power, matching it perfectly to your current needs.

Neno Perla Twin

Double version of the Neno Perla breast pump

Go for the comfort

The Neno Perla fits into a bra cup. What's more, it adapts to your bust while freeing your hands. It's the perfect excuse to pursue your current desires without any restrictions.

*Phenomenal
appearance*

It stands out for its innovation
and design, with a brocade finish
and trendy beige colour.

USB C cable

With the included cable with universal USB C input, you can easily charge the device. After two hours of charging, it provides approximately 4 full pumping sessions (30 minutes each).

Always at hand

A breast pump that fits in your handbag? The Neno Perla is it! Throw the device in your handbag and pump wherever you are.

Lightweight construction

The lightweight and ergonomic breast pump is the perfect companion for every mum. As it fits easily into backpacks and handbags, you can take it with you anywhere.

Comfortable use

After expressing the milk, you can easily store it in the fridge by securing the container with the lid. You can also pour it straight into a bottle!

Durable battery

The Neno Perla is equipped with a high-capacity battery, eliminating the need for frequent recharging. This is a great convenience for women with active lifestyles who want to pump regularly at the same time.

Easy cleaning

Worried about how to clean the milk container?
No problem! The included silicone brush with
many nubs will help.

quick sterilisation

Maintaining good hygiene when expressing milk reduces the risk of your baby coming into contact with harmful organisms. Pay particular attention to frequent sterilisation of parts that come into direct contact with milk.

Full discretion

Worried about the sound of your device bothering those around you? Not at all! The breast pump is so quiet that you can use it in any environment.
