neno[®] Freedom Series

Freedom Series Breast Pumps

Imagine a moment of peace. You are sitting comfortably, holding a warm cup of tea, and your hands are free. You don't have to give up relaxation or put your book aside because the hands-free breast pump works for you. This device is designed for moms who want to balance childcare with everyday responsibilities. Its compact and discreet design allows you to express milk without using your hands, giving you more freedom whenever you need it.

Stylish, discreet, and efficient

Neno Vento is an elegant, minimalist shell-shaped breast pump that fits perfectly inside your bra. It's quiet operation ensures that you can use it even when your baby is sleeping.

Mimics a baby's natural sucking reflex

The pump operates in three phases, closely replicating a baby's natural sucking rhythm:

Phase I – stimulation mode

fast, gentle movements stimulate milk flow.

Phase II – deep expression mode

slower, deeper, and more intense movements enable effective milk expression.

Phase III – mixed mode

an innovative combination of both modes, particularly helpful in boosting milk supply.

Soft and gentle breast shield

The soft silicone breast shield adapts to the shape of your breast, ensuring comfort and preventing irritation. The shield cover protects it from dust and dirt, maintaining hygiene and readiness for use.

An exploded view of a breast pump system, showing various components including a large white lid, a clear plastic cup, a white pump housing, and several small white connectors and seals. The components are arranged in a circular pattern around a central clear plastic cup. The background is a dark brown gradient.

*Closed system
for maximum hygiene*

Neno Vento features a closed system that prevents milk from coming into contact with the pump's internal components. This ensures that every drop of milk goes directly into the container, preserving its nutritional value and maintaining hygiene.

Spacious and large-capacity shells

You don't need to interrupt milk expression to empty the container. The 150 ml shell allows you to collect enough milk in one session, making the process quick and convenient.

*Adjustable fit
for maximum
comfort*

Every mom deserves comfort, which is why the breast pump comes with four size reducers (15/17/19/22 mm). This allows you to customize the breast shield to fit your nipple size, ensuring safe and effective milk expression.

Milk expression time monitoring

The built-in timer with a pause function helps you track the duration of your session. You can relax or focus on other tasks while the device ensures your milk expression lasts as long as needed.

Protective cover

Need to pause your session? The protective cover shields the breast shield from dust and contaminants, keeping the device clean and ready for use whenever you need it.

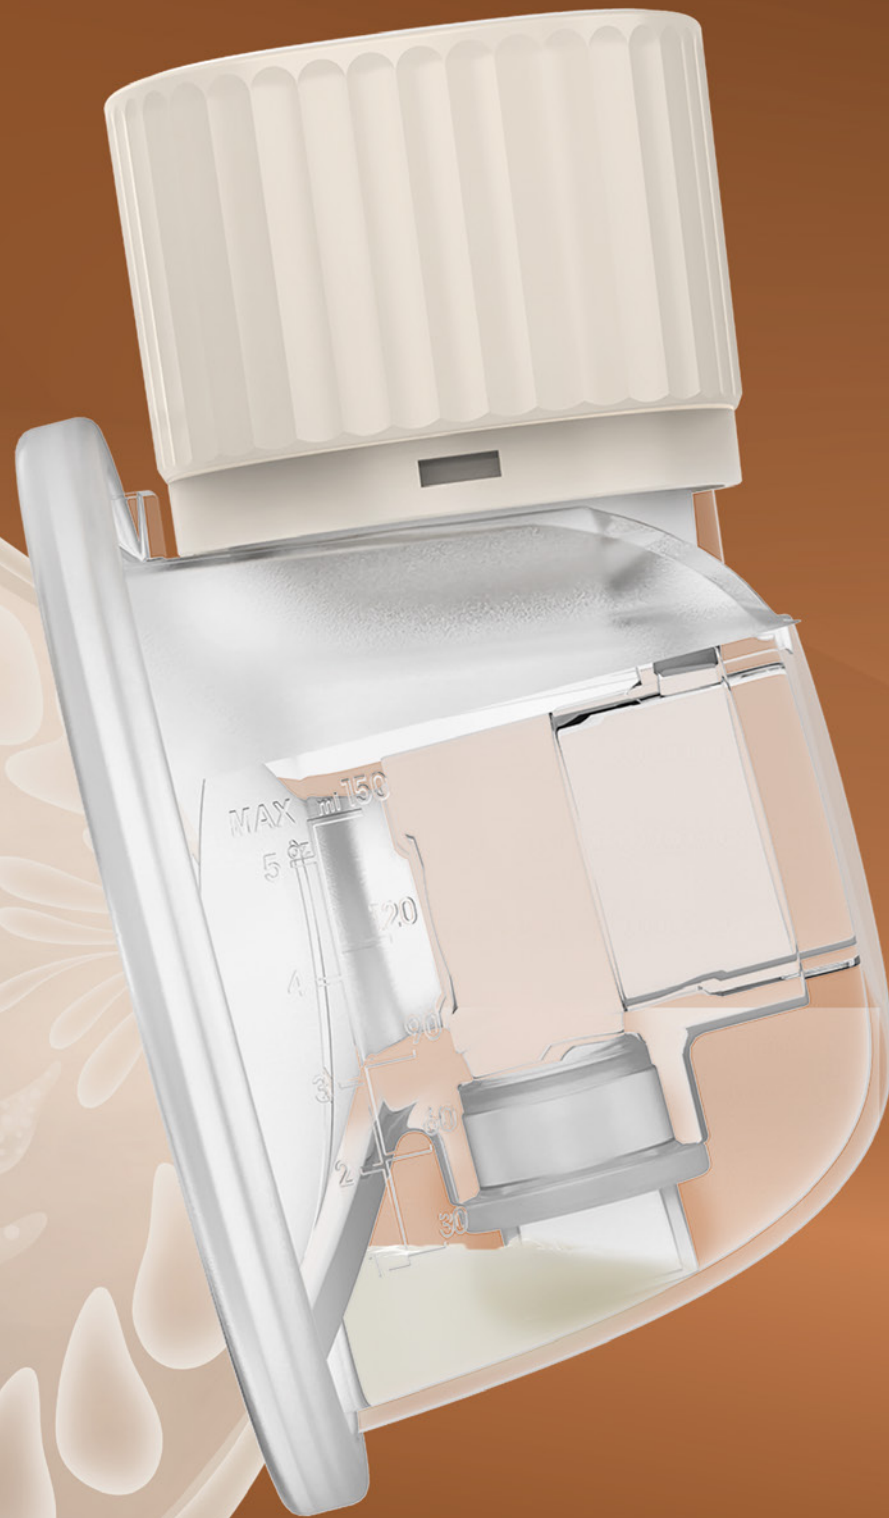

Thoughtfully designed set

Everything you need comes in one box: Pump unit, 25mm silicone breast shield, 4 size reducers (15/17/19/22 mm), membranes and valves, 150 ml milk container, USB-C charging cable. This carefully designed set ensures comfort and convenience for every mom.

Lactation support at every stage

Neno Vento provides essential support at every stage of breastfeeding. From the first days after childbirth to moments when extra milk stimulation is needed, and even when returning to work—this breast pump adapts to your needs. Its natural pumping rhythm supports milk production, making daily feeding easier.

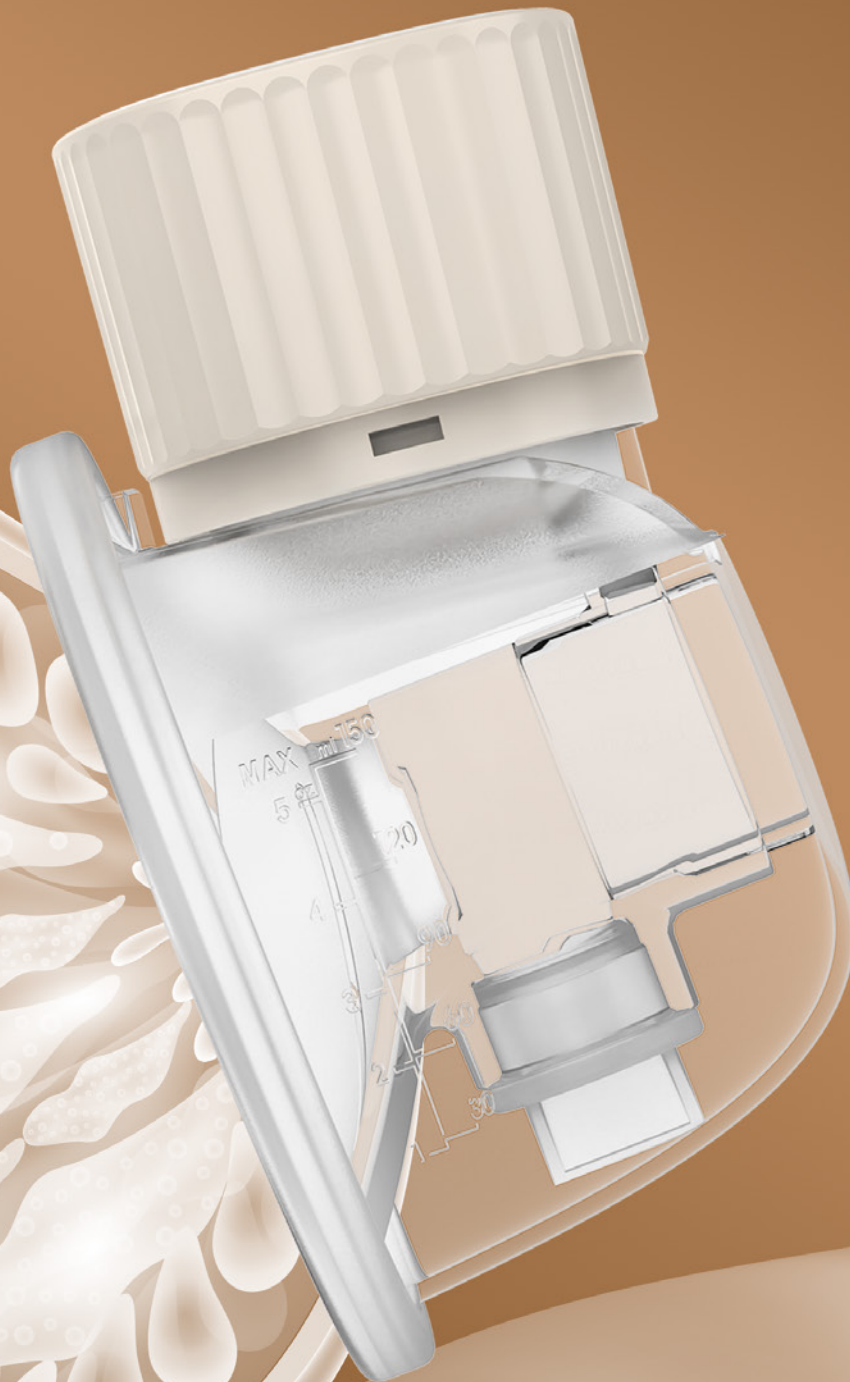

4 size reducers for a perfect fit

Every mom is different, which is why Neno Vento includes four size reducers to ensure a comfortable and effective fit, regardless of breast and nipple shape.

Ergonomic breast shield

The ergonomic breast shield gently contours around the breast, ensuring a secure, leak-proof fit without discomfort. Its thoughtful design makes the milk expression process comfortable and safe for every mom.

Intuitive and convenient operation

The function panel is designed for quick and easy use. With just one touch, you can switch modes or adjust the intensity level to fit your comfort.

Compact and travel-friendly

The Neno Vento shell-shaped breast pump can accompany you wherever you go. Its compact design allows it to fit easily into your bag or backpack, making it perfect for moms on the move.

Fits inside your bra

Thanks to its shell-shaped design, the breast pump perfectly conforms to your body and fits inside your bra, allowing for discreet, hands-free milk expression.

Daily convenience

Having your hands free while expressing milk is invaluable. You can take care of your baby, work on your laptop, or simply enjoy a moment of rest – Neno Vento gives you that choice.

Quick and easy milk transfer

Once you're done expressing milk, you can quickly and easily transfer it from the container to a bottle, keeping everything tidy and saving time.

Easy cleaning

Cleaning the breast pump takes just a few moments. Simply disassemble the parts that come into contact with milk and rinse them under running water – simple, fast, and hygienic.

Effortless sterilization

The breast pump components can be easily sterilized in boiling water or a sterilizer, ensuring safety and proper hygiene at all times.

USB-C charging cable included

The USB-C cable ensures fast and convenient charging, allowing you to use the pump wherever and whenever you need it.

A stylish and perfect gift

With its modern design, pastel colors, and innovative functionality, Neno Vento makes an ideal gift for a future mom. The breast pump is practical, efficient, and an indispensable tool in daily baby care.
