Time-saving

There are only 24 hours in a day—and we know that's sometimes not enough. That's why

Neno Lago was created to save what's most valuable—your time. All you have to do is pour the right amount of infant milk into the bottle, press the button and the machine will add the amount of water you have chosen.

neno PREMIUM

 *boiling*

 *cooling*

 *reheating*

Neno Lago not only boils but also cools and reheats water. These functions let you decide the exact temperature needed to prepare milk or food. If the water is too hot, use the cooling function—a convenient way to quickly lower the temperature to the desired level.

neno PREMIUM

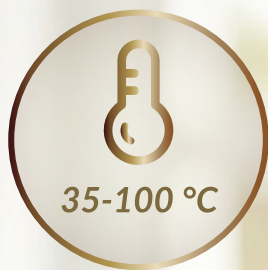

Always clean water

The Neno Lago machine includes a self-cleaning function to remove mineral deposits, which activates automatically when the device is unused for a long time. This ensures that the water used to prepare formula milk is always clean and free from contaminants—supporting your baby's health and safety.

neno PREMIUM

61 temperature settings

Neno Lago gives you full control over water temperature, which is crucial for proper formula preparation. The machine offers as many as 61 temperature settings, from a gentle 35°C to 100°C. This way, you can easily prepare milk tailored to your baby's needs.

neno PREMIUM

Silent mode

Neno Lago is equipped with a silent operation mode, allowing you to prepare milk comfortably at any time of day or night.

neno PREMIUM

Temperature maintenance

With Neno Lago, you don't have to worry about water temperature. The temperature maintenance function lets you prepare milk at any time—without constant reheating or cooling—saving your precious time.

neno PREMIUM

Night light

Feeding doesn't stop after dark. That's why Neno Lago features a built-in night light that helps you prepare milk without turning on room lights. The gentle illumination lets you work without disturbing your baby's sleep.

neno PREMIUM

Programmable water dispensing volume

You know your child's needs best. Neno Lago allows precise water dispensing—from 30 to 300 ml—making it easy to prepare a portion suited to age, time of day, or appetite.

neno PREMIUM

Use of tap water

Neno Lago does not require bottled water. Simply fill it with tap water—the device heats it to the desired temperature and prepares it for feeding. Simple, fast, and without unnecessary steps

neno PREMIUM

Ease of use

Neno Lago is designed for everyday convenience. The 2-liter tank means less frequent refilling, and the automatic cleaning function ensures each portion is prepared with fresh water. The touch control panel includes a lock, so your settings remain unchanged.

SPECIFICATION

Model:	Neno Lago
Supply voltage:	220V-240V~ 50/60Hz
Heating power:	1000 W
Maximum capacity:	2L
Product dimensions:	33x17x29 cm
Product weight:	2,54 kg
Box dimensions:	37x33x26 cm
Box weight:	3,35 kg
