Two-Way Communication

As a mom, you want to be sure your baby is safe. Your little one also needs to feel that you're close. The Neno Ciao baby monitor enables two-way communication, so you can hear your baby and instantly soothe them with your voice.

Alarm Function

A moment to breathe is priceless for a new mom. Neno Ciao discreetly helps you maintain your daily routine by reminding you about feeding times, diaper changes, or nap schedules. This makes it easier to organize your day at your own pace.

8 Lullabies

Babies end their day in all kinds of moods. That's why Neno Ciao supports parents with eight different lullabies – so you can choose a melody that suits your child and create a calming atmosphere for a peaceful night's sleep

Always in the Right Spot

Neno Ciao gives you the freedom to place it wherever it works best. The flexible stand and wall-mounting kit make it easy to adapt the device to your daily needs.

Night mode

Night doesn't mean a break from care. When the lights go out, Neno Ciao switches to night mode and keeps watching over your baby. Thanks to infrared technology, the image remains clear even in complete darkness – up to 5 meters. This discreet function provides peace of mind after dark.

Long Range

Neno Ciao lets you go about your day without losing contact with your baby. A stable connection offers up to 50 meters of range indoors and up to 300 meters outdoors – so you can be in another room, the garden, or on the patio while keeping your baby within sight and heart.

Extra Eyes

With vertical and horizontal rotation, the Neno Ciao camera gives you a full view of the room – without needing to reposition the device. You can smoothly pan across the space to see every corner and stay informed about your baby's activities at any time of day.

Rotating Camera Head

With vertical and horizontal rotation, the Neno Ciao camera gives you a full view of the room – without needing to reposition the device. You can smoothly pan across the space to see every corner and stay informed about your baby's activities at any time of day.

90°

355°

Temperature Sensor

Thermal comfort matters – especially in the early months. Neno Ciao features a temperature sensor that continuously displays the room's current conditions on the receiver screen. It's a subtle function that supports daily care and brings added peace of mind.

24.5°C

Large Screen with 4x Zoom

The large 5-inch screen lets you see what matters at a glance. Plus, Neno Ciao offers 4x zoom, so you can easily notice every movement and gesture. One quick look – and you know everything's fine.

Longer Battery Life

With a built-in 5000 mAh battery, the Neno Ciao screen can operate for up to 8 hours of continuous use without charging – and up to 12 hours in VOX mode. VOX mode automatically responds to sounds from your baby's room, even soft ones like sleep murmurs. The screen activates only when needed, helping you manage your time better and extending battery life. It's a solution that gives you more freedom throughout the day – no constant charging, no disruptions.
