# Three Brightness Levels

Neno Cosmo is more than just a night light — it's a reliable companion for your child's everyday moments. With three brightness levels (100%, 50%, 25%), the lamp easily adapts to your child's needs and daily routine.

11 Lighting Modes

Neno Cosmo offers 11 lighting modes — from soft, steady light to gentle color transitions — creating a cozy space where your child can both play and relax.

Pleasant to the Touch

Exploring the world through touch is a natural part of a child's development, which is why Neno Cosmo is covered in smooth, soft silicone. The lamp's flexible coating allows it to be gently squeezed without risk of damage.

made of soft, non-heating material

Cosmic Lighting Pattern

A child's imagination grows every day, opening doors to incredible discoveries and magical adventures. With projected space-themed objects and planets, Neno Cosmo transports your little one to a dreamy world of exploration.

Touch Control

Designed with the youngest users in mind, Neno Cosmo is incredibly intuitive — even a child can operate it with ease. A gentle tap is all it takes to light up a magical display of colors and effects. You decide when and how to set the mood — for playtime, falling asleep, or nighttime feeding.

the lamp operates for a long time on a single charge

USB-C Charging

Functionality and ease of use are our top priorities. With USB-C charging, you don't have to worry about cable compatibility. The charging process is fast and safe, and once fully charged, Neno Cosmo can operate for up to 4.5 hours continuously at the highest brightness level.

Wireless Operation

The cordless Neno Cosmo lamp can go wherever your child goes — next to the crib, on the couch, or anywhere else in the home. Its built-in battery ensures long-lasting, reliable performance without frequent charging.

Child-Friendly Design

Neno Cosmo is a charming, smiling cloud that glows in yellow, white, and blue — adding a magical atmosphere to any child's room. Its soft texture invites little ones to safely explore its shape and functions.
