Soft and comfortable

Neno is a brand that focuses on the comfort of the little ones. The Neno Mila horn has been filled with anti-allergenic fleece, which provides the right softness. The cotton material is gentle to the skin and pleasant to the touch - creating the ideal conditions for a peaceful sleep.

Child-friendly design

The Neno Mila is distinguished by its pleasant, childlike design. The delicate teddy bear pattern brings warmth and a sense of cosiness to a child's space. The bright, pastel colours will fit perfectly into any interior.

Practical

The Neno Mila cone has been designed with new mothers in mind - with no loose parts that could pose a danger to the baby. Thanks to the adjustable fastening, the cone comfortably adapts to the baby's body. It can be easily washed and the quick-drying material retains its smoothness and elasticity, guaranteeing a unique quality every day.

Neno Mila has been handmade in Poland with the utmost attention to detail. OEKO-TEX Standard 100 certificate confirms the use of materials that are safe for the baby's health and have been tested for harmful substances. The hood has an anti-allergenic fibre filling and strong seams to ensure very good durability.

High quality
