STERILISER AND
BOTTLE WARMER WITH
DRYING FUNCTION

Multifunctional
4w1

**Drying +
Sterilization**

*Every Mom
is a Superhero!*

4 functions 1 product

Neno Puro is a device that adapts your needs. Choose one of four programs: sterilization, drying, sterilization with drying, or warming. One product, many possibilities!

sterilization

drying

sterilization
and drying

warming

Sterilization with drying

It takes only 40 minutes for bottles and accessories to be perfectly clean, dry, and ready to use. Neno Puro first thoroughly sterilizes with steam, then uses a strong stream of purified air to dry them. No need to wipe or air dry – everything is ready for the next feeding.

40 min

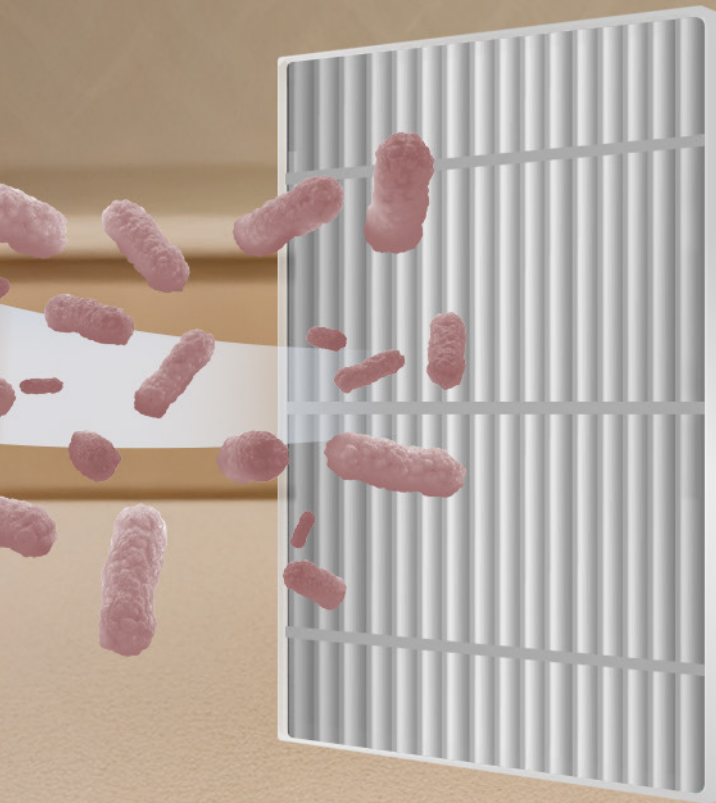

Cleanliness and safety every day

With Neno Puro, you can be sure that what matters most is truly clean. Sterilization with hot steam at 100°C eliminates up to 99.9% of bacteria – no chemicals, no compromises. Natural, gentle, effective, and caring – that's how Neno Puro works.

Dryer filter

The Neno Puro dryer is equipped with a special filter that purifies the air entering the device. This ensures bottles and accessories are dried in a highly hygienic environment – free from dust, pollen, and microorganisms.

Space for 4 bottles

Neno Puro holds up to four bottles at once, allowing you to conveniently take care of multiple accessories in one go. A practical solution that makes everyday baby care easier.

Teats tray

The dedicated tray allows safe sterilization of pacifiers, caps, and other small items. It's a convenient way to reach even the hardest-to-clean areas.

*Intuitive
touch panel*

The modern touch panel makes using Neno Puro quick and easy. All functions are at your fingertips – just one touch to activate the desired mode.

Space-saving

Sterilizer, dryer, and warmer in one – Neno Puro replaces several devices. Less equipment on the counter, more space for you. It holds everything you need in one cycle – from bottles to pacifiers. Ideal for parents who value convenience and order.

Easy to clean and assemble

Every part of Neno Puro can be easily disassembled and washed. This keeps the device hygienic at all times without wasting time on difficult cleaning.

Compatible with all bottle types and sizes

No matter which bottles you choose – Neno Puro fits them all. Its universal interior grows with your baby's needs.

Temperature maintenance function

Once the drink is ready, Neno Puro keeps it warm for a long time. No need to reheat – everything stays warm and ready exactly when needed.

Convenient water measuring

Neno Puro is not just a modern solution for parents – it's also convenient and precise. The set includes a practical measuring cup for accurately measuring the water needed for warming or effective sterilization.

MEASURING CUP 10 ML - 120 ML

Tongs included – convenience and safety

With the Neno Puro device, you get practical tongs to safely remove hot bottles and accessories after the sterilization cycle. A small yet essential addition that protects your hands from burns and ensures extra user comfort. With them, you can hygienically handle clean items without touching them directly.
