ELECTRONIC BABY MONITOR  
WITH WIRELESS RECEIVER

Two mounting  
options

Horizontal  
and vertical  
rotation  
with zoom

# *Automatic night mode*

With Neno Vedo Blue, you don't have to worry about changing settings after dark. The built-in night mode automatically adjusts to darkness, ensuring a clear image even when the lights are off. This allows you to watch your child without disturbing their sleep – all night long.

# *Large screen, greater convenience*

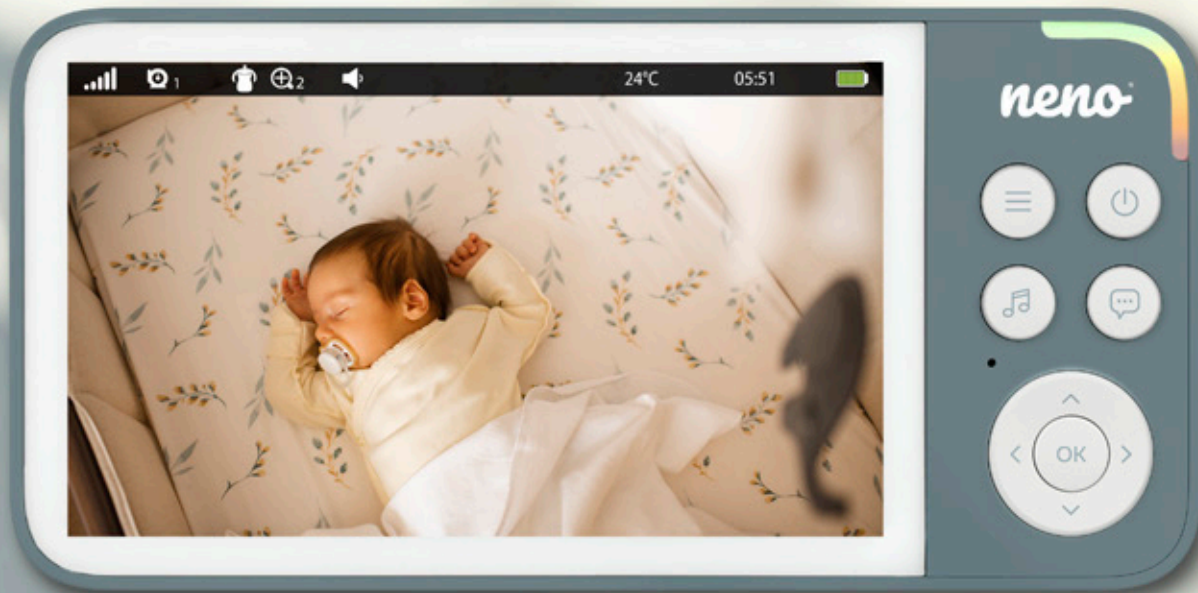

The 5-inch display provides a clear image even from a distance. No need to zoom in, you can see at a glance that everything is just fine. It's convenience that counts in daily rush and night-time vigil.

# *Long range*

With a reliable range of up to 50 m indoors and up to 300 m outdoors, you can move around your house or garden while staying in touch with what's happening in your child's room. It's the comfort you need, without compromising on safety.

## *4x zoom*

When you want to take a closer look, just click once. The 4x zoom function allows you to observe details closely without moving closer to the monitor. See every movement, smile or gesture, even from a greater distance.

*x 2*

*x 4*

## *VOX standby mode*

Energy-efficient and intelligent, VOX mode ensures that the baby monitor only activates when it detects sound. When your child is sleeping peacefully, the device remains in standby mode. However, the slightest sound will automatically activate the screen. In addition, when there is a sound in the room – crying, babbling or other noises – the light indicator immediately signals this, even if the receiver is muted. It's a silent help that gives you peace of mind that you'll always notice when your child needs you – without disturbing the peace and quiet of your home.

detected sound

# *Rotating head*

The camera can be rotated 65° vertically and 355° horizontally, allowing you to see every corner of the room. The viewing angle can be controlled smoothly and intuitively from the receiver panel, giving you a complete view of what is happening around your child, regardless of their location in the room.

# *6 pre-loaded lullabies + white noise*

A varied set of six soothing melodies and white noise gives you ability to create the perfect background for sleep. Each option has been selected with children's needs in mind – from gentle calming to effective soothing of crying.

# *Temperature sensor*

The temperature in your child's room matters – especially when they are very young. The built-in sensor constantly monitors the conditions and informs you in real time. This gives you full control over your child's comfort.

25°C • - - - - -

# *Alarm function*

Set your own reminders so you don't forget important moments of the day. Neno Vedo Blue helps you organise feeding, changing and other rituals – at your own pace. It's every mum's personal assistant.

# *Two-way communication*

Neno Vedo Blue is more than just a view – it's a connection. The two-way talk feature lets you talk to your child whenever they need you. Without entering the room, you can calm them down or simply let them know you're nearby.

# *Built-in light*

The soft light emitted by Neno Vedo Blue can be used as a subtle night light. Perfect for not disturbing your child while it sleeps, while still allowing you to safely check or change the baby.

# *Always in its place*

Safe installation is essential. Neno Vedo Blue can be easily placed on a piece of furniture, attached to wall or hung in the right place. Thanks to its flexible handle, the device adapts to any interior – just the way you need it.

# *Two colour options*

Neno Vedo is available in two unique colours: subtle cream (Neno Vedo Cream) and elegant, muted blue (Neno Vedo Blue). Both colours blend harmoniously into any interior, adding a stylish touch to the device. They are perfect for a child's room as well as a modern home décor. Choose the variant that best reflects your taste and needs to enjoy functionality in a beautiful form.

## *Additional view*

Do you have more than one child? Or maybe you want to monitor several rooms? Neno Vedo Blue allows you to connect an additional camera, enabling simultaneous viewing from different locations. It is the perfect solution for parents who want to keep an eye on their entire home without having to switch devices. If you would like to take full advantage of the two-cameras pairing feature, we recommend purchasing an additional Neno Vedo camera.
