grows with your child

removable tray

A baby with light brown hair and blue eyes is sitting in a light-colored wooden high chair. The baby is wearing a pink and white striped long-sleeved shirt and grey and white striped leggings with pink socks. A pink water bottle is on the high chair's tray. The high chair has a wooden frame and a black safety harness. The background is a blurred kitchen with white cabinets and shelves.

Designed to Grow with Your Child

Neno Pino is a multifunctional high chair created with your child's safety and comfort in mind. Its solid wooden frame ensures stability and durability, while eco-friendly materials highlight the product's natural character. Adjustable components make it easy to adapt the chair as your child grows — from their very first meals to a comfortable seat for an adult. A long-lasting solution for years to come.

3-point safety harness

Your baby's safety is every parent's top priority — especially during mealtime. That's why Neno Pino is equipped with a 3-point safety harness that keeps your little one securely in place without restricting their freedom of movement. Combined with a contoured backrest and adjustable footrest, it provides ergonomic support and comfort during every meal.

5-level adjustable footrest

Comfort is just as important as safety. Neno Pino features a five-level adjustable footrest, allowing your child to rest their feet comfortably and maintain a healthy posture during meals. This simple yet thoughtful feature ensures ergonomic support for your growing child.

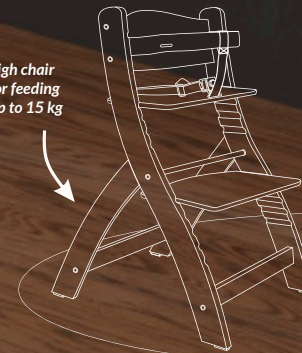

4 adjustable seat heights

Adapting the chair to your table height is key to comfortable and safe feeding. Neno Pino offers four seat height settings, so you can easily find the perfect level – whether your little one is just starting to eat solids or already sits confidently at the family table.

low chair
up to 65 kg

Grows with Your Child

As your baby grows, their needs change almost every day. Thanks to its adjustable seat and footrest, Neno Pino evolves along with your child's development. From around 6 months, when your baby can sit independently, it serves as a safe and comfortable high chair. Later, it can be transformed into a taller chair for an older child or even an adult seat with a load capacity of up to 65 kg. A truly practical solution that stays in your home for years.

Durable wood – naturally strong

Neno Pino is made from high-quality laminated wood that ensures lasting stability and strength. This beautifully crafted piece of furniture not only looks elegant but also maintains its durability over time. It's the perfect combination of solid construction and natural beauty for the whole family.

Ergonomic backrest

Proper posture is essential during meals. Neno Pino's ergonomically shaped backrest adapts to your child's spine, providing natural support and helping promote healthy posture. This ensures comfort and spinal support during every feeding session.

Removable tray

For parents' convenience, Neno Pino comes with a detachable tray. It's easy to remove and clean after every meal, so you don't have to worry about food residue or stubborn stains. Once your child is ready to join the family at the table, simply detach the tray — the chair easily transitions for use at any dining setup.

Easy to Move

Neno Pino was designed with practicality in mind. It's lightweight and easy to carry, allowing you to move it effortlessly between rooms — from the kitchen to the dining area or living room. A perfect blend of solid construction and everyday convenience.
