motor skills

Soothes
and calms

Every Mom
is a Superhero!

Handcrafted, Soft Plush Figures

Adorable deer and delicate butterflies are lovingly handmade from soft, pleasant-to-touch fabrics. More than just decoration, these charming details bring warmth and coziness to your baby's room.

Easy to Assemble

Setting up the Neno Rosi mobile takes only a moment and doesn't require any additional tools. Its intuitive design makes installation quick and effortless.

The included mounting arm allows you to securely attach the mobile to most baby cribs — combining convenience, safety, and functionality in one elegant solution.

Visual Stimulation

The gently moving deer and butterfly ornaments capture your baby's attention, encouraging visual tracking and focus. It's a natural and soothing way to support the development of vision and concentration from the earliest months.

A baby with blue eyes and a wide smile is lying on its back on a white quilted blanket. The baby's right arm is extended upwards, reaching towards a pink star-shaped plush toy hanging from above. Several other colorful plush toys, including a green heart and a pink flower, are also visible hanging in the background. The scene is brightly lit, creating a warm and playful atmosphere.

Encourages Early Motor Skills

The softly swaying plush toys invite your little one to reach out, helping develop coordination and hand movement. These simple gestures mark the beginning of natural, playful motor activity.

A Charming Nursery Accent

The Neno Rosi mobile adds a touch of harmony and nature-inspired warmth to your baby's space. With its gentle deer and butterfly motif, it creates an enchanting atmosphere — the perfect finishing touch for a peaceful, cozy nursery where your baby can rest and play.
