Controlled brushing time

Neno Pulito is an electric toothbrush designed to help children learn proper brushing habits. It features a built-in timer that controls brushing time. Every 30 seconds, the brush gives a gentle signal reminding the child to switch sides. One full cycle lasts 2 minutes - exactly as recommended by dentists.

High vibration frequency

The toothbrush stands out with its high vibration frequency, while still being gentle on a child's gums. Operating at 38,000 vibrations per minute, it effectively removes plaque and cleans between teeth, ensuring thorough brushing even in hard-to-reach places. The high frequency promotes good oral hygiene habits from an early age.

38000
vibrations per minute

Replaceable nylon-bristle heads

Neno Pulito comes with brush heads made from soft, flexible nylon bristles that are safe for baby teeth and sensitive gums. The synthetic fibers clean effectively without causing irritation, and their easy-to-clean structure ensures everyday comfort. The set includes one replaceable brush head that can be easily attached and should be changed every 3 months to maintain hygiene and optimal performance.

For children aged 3+

Designed for kids from the age of 3, the Pulito toothbrush supports early attempts at independent oral care.

Its lightweight construction, gentle bristles, and simple operation allow children to use it on their own every day. It's a great way to encourage healthy habits and nurture a beautiful smile from a young age.

Three brushing modes with LED lighting

Pulito offers three brushing modes tailored to your child's needs:

Soft - gentle cleaning for beginners,

Clean - thorough everyday brushing,

Massage - a delicate gum-massage mode that supports circulation.

Each mode is marked with a colorful LED light, making it easy to distinguish and turning daily brushing into a more engaging and motivating experience for kids.

IPX7 ***waterproof***

Thanks to its IPX7 waterproof rating, Pulito performs perfectly in a humid bathroom environment and remains safe even if it gets splashed or accidentally submerged. The durable, water-resistant design allows children to use the toothbrush freely at the sink without worrying about damaging the device. It's a practical feature that enhances durability and overall comfort of use.

Adorable kid-friendly design

The toothbrush features a cheerful, child-friendly design. Available in coral and blue, its casing is decorated with cute sea animals - turtles, crabs, fish, octopuses - along with bubbles and seaweed, creating a fun underwater scene. This playful look turns brushing from a chore into an exciting little adventure.

Hygienic protective case

A practical protective case allows you to store the toothbrush safely and hygienically, both at home and while traveling. It shields the brush head from dust, dirt, and bacteria, ensuring it stays clean and ready to use at any moment. It's a convenient solution that guarantees hygiene wherever you go.

A perfect gift for little explorers

The Pulito toothbrush makes a thoughtful and fun gift that encourages kids to take care of their teeth. Its colorful, ocean-themed design introduces children to the underwater world, helping them associate oral hygiene with water, cleanliness, and play. The LED lights and three brushing modes make brushing enjoyable, while the high vibration frequency and soft bristles ensure safety and effectiveness. With its intuitive design, it's perfect for children aged 3 and up, combining an appealing look with real care for a healthy smile.
