2 soft tips

Neno Corto is a cordless nasal aspirator that has been designed with comfort and safety in mind. Two interchangeable tips gently fit the baby's nasal passages, allowing effective removal of mucus without irritating the delicate mucosa. The soft material minimizes the risk of irritation and helps ensure maximum comfort. The interchangeable tips make it easy to adapt the aspirator to the child's age and needs, supporting proper nasal hygiene during everyday care.

From the first day of life

The Neno Corto nasal aspirator has been designed with the youngest users in mind and can be safely used from the first days of life. It helps gently remove nasal secretions, supporting proper nasal hygiene and keeping the airways clear. This is especially important during infections or colds, when excess mucus can make breathing difficult, disrupt sleep, and cause discomfort—particularly at night, when nasal congestion tends to worsen.

3 melodies

Three melodies make nasal cleansing more pleasant, helping distract the child and reduce stress during use. Gentle sounds soothe the baby, ease anxiety, and make the procedure quicker and easier to carry out. As a result, nasal care becomes calmer, and parents can more effectively ensure their child's comfort and clear breathing. The melodies also support positive associations with daily care routines, making future use easier.

Easy cleaning

The aspirator is equipped with a transparent container that collects nasal secretions, allowing you to quickly check its contents. The container can be easily removed, making it simple to empty and rinse. This solution supports daily hygiene, ensures convenient use, and allows the device to be quickly prepared for the next use. Keeping the aspirator clean and ready at all times is especially important when caring for a young child.

Colorful LED lights

Colorful LED lights in various shades attract the child's attention and help focus it on an appealing visual element. They effectively distract the baby and help keep them calm throughout the procedure. This reduces stress, increases the child's comfort, and makes the aspirator easier to use. The lights also draw the child's attention, helping build positive associations with daily care routines. As a result, nasal cleansing becomes faster and more comfortable for both the child and the parent.

Lightweight and portable

The Neno Corto aspirator stands out for its lightweight, compact design, making it easy to carry and use in different places. Thanks to its cordless construction, it can be taken along and used while traveling, on walks, or anywhere at home. Its handy size and ergonomic shape ensure comfortable handling, allowing parents to use it with confidence. This makes it a practical solution for active parents who value mobility and convenience in everyday childcare.

5 suction levels

Five adjustable suction levels allow precise control to suit the child's age and needs. The lowest setting is ideal for newborns, providing gentle yet safe suction for delicate nasal passages. Higher levels are suitable for older children, effectively removing thicker secretions with appropriate strength. This range of settings ensures effective nasal cleansing while maintaining comfort and safety. With intuitive controls, parents can easily adjust the aspirator to their child's changing needs at every stage of development.

USB charging

The Neno Corto aspirator features USB charging, significantly increasing everyday convenience. It can be charged using a standard wall charger, power bank, or laptop, eliminating the need for disposable batteries. This makes the device practical and reliable both at home and on the go. USB charging also allows the aspirator to be quickly prepared for use, which is especially important in urgent situations related to colds or nasal congestion in children.

What's included

The Neno Corto aspirator comes in a practical, complete set designed for everyday use and easy storage. The package includes a cleaning brush, a storage pouch, a USB charging cable, and an interchangeable tip. With all accessories always at hand, the aspirator can be easily kept clean and conveniently taken along when traveling.

TECHNICAL SPECIFICATIONS

| | |
|---------------------|---|
| Tip material: | Silicone |
| Input: | 5V 1A |
| Dimensions: | 17.6 x 4.4 x 5.2 cm |
