5 ***cleaning*** *modes*

LAUR KLIENTA 2023

Premium Hygiene System

Feel the difference in oral care with the new, unique Neno Oriona electric toothbrush. The advanced Premium Hygiene System takes care of your teeth and oral cavity on multiple levels. With 5 operating modes, everyone can find the right option to better support daily hygiene and gum health. The built-in timer ensures brushing lasts the dentist-recommended 2 minutes. Gentle yet effective replaceable brush heads with nylon bristles thoroughly clean teeth and gums, providing a long-lasting feeling of cleanliness and freshness. A discreet LED charging indicator confirms the device is ready for use, while the elegant travel case lets you enjoy the same high standard of hygiene wherever you go.

31,000 Vibrations

Up to 31,000 vibrations per minute allow the Neno Oriona sonic toothbrush to effectively remove plaque and impurities even from hard-to-reach areas. This vibration frequency sets not only the bristles in motion, but also creates microbubbles from toothpaste and water that reach interdental spaces and along the gumline. The result is exceptionally thorough yet gentle cleaning that is safe for enamel and gums, without causing mechanical irritation.

Built-in Timer

Want to be sure you brush long enough and thoroughly? Each of the 5 operating modes features a 2-minute timer – the time recommended by dentists for effective oral hygiene. Every 30 seconds, the toothbrush signals a short pause to indicate when to change brushing zones, ensuring all areas are cleaned evenly and with proper care.

IPX7 Water Resistance

A quick brush in the shower, a rushed morning routine, or an evening ritual at the sink – Neno Oriona keeps up with you in every situation. With IPX7 water resistance, it is not affected by moisture, splashes, or contact with water. You can safely use it in the bathroom and rinse it under running water after brushing. The sealed, durable construction protects the interior of the device, ensuring safety and reliability every day.

Inductive Charging + LED Charging Indicator

The Neno Orion electric toothbrush can be charged easily and conveniently – simply place it on the illuminated charging station, which is connected to a USB power supply, to start wireless inductive charging. The built-in LED indicator activates during the charging process and allows you to monitor its status in real time. When fully charged, the LED backlight turns off, signaling that the device is ready for use.

Replaceable Nylon Bristle Brush Heads

Choose the highest level of oral hygiene with replaceable brush heads made of nylon bristles. This material is especially recommended for sonic toothbrushes – it is durable, resistant to deformation, and easy to keep clean. The flexible nylon bristles effectively remove plaque, while an additional rubber cross on the brush head enhances the polishing effect, leaving teeth feeling smooth. Extra cleaning elements on the back of the head help clean the tongue surface, supporting fresher breath. One replaceable brush head is included with the toothbrush.

Travel Case Included

The Neno Oriona comes with a practical travel case that allows for safe storage and convenient transport. Designed to hold both the handle and the brush head, the case protects them from dirt and damage. It is a hygienic and functional solution, perfect for travel, short trips, and everyday use outside the home.

5 Operating Modes

Neno Oriona is an intelligent toothbrush you can tailor to your needs. With 5 available cleaning modes, you can choose the type of care that suits you at any given moment. The whitening mode removes surface stains and restores the natural color of teeth, while the gentle daily mode protects sensitive teeth and gums. Beginners will appreciate the mode with a smooth transition from weaker to stronger vibrations, making adaptation to an electric toothbrush easier. The massage mode supports gum health, and the 2-minute polishing program smooths teeth and enhances the whitening effect, leaving a feeling of perfect cleanliness and oral freshness. Choose Neno Oriona and discover that your teeth can be healthy, strong, and well cared for.

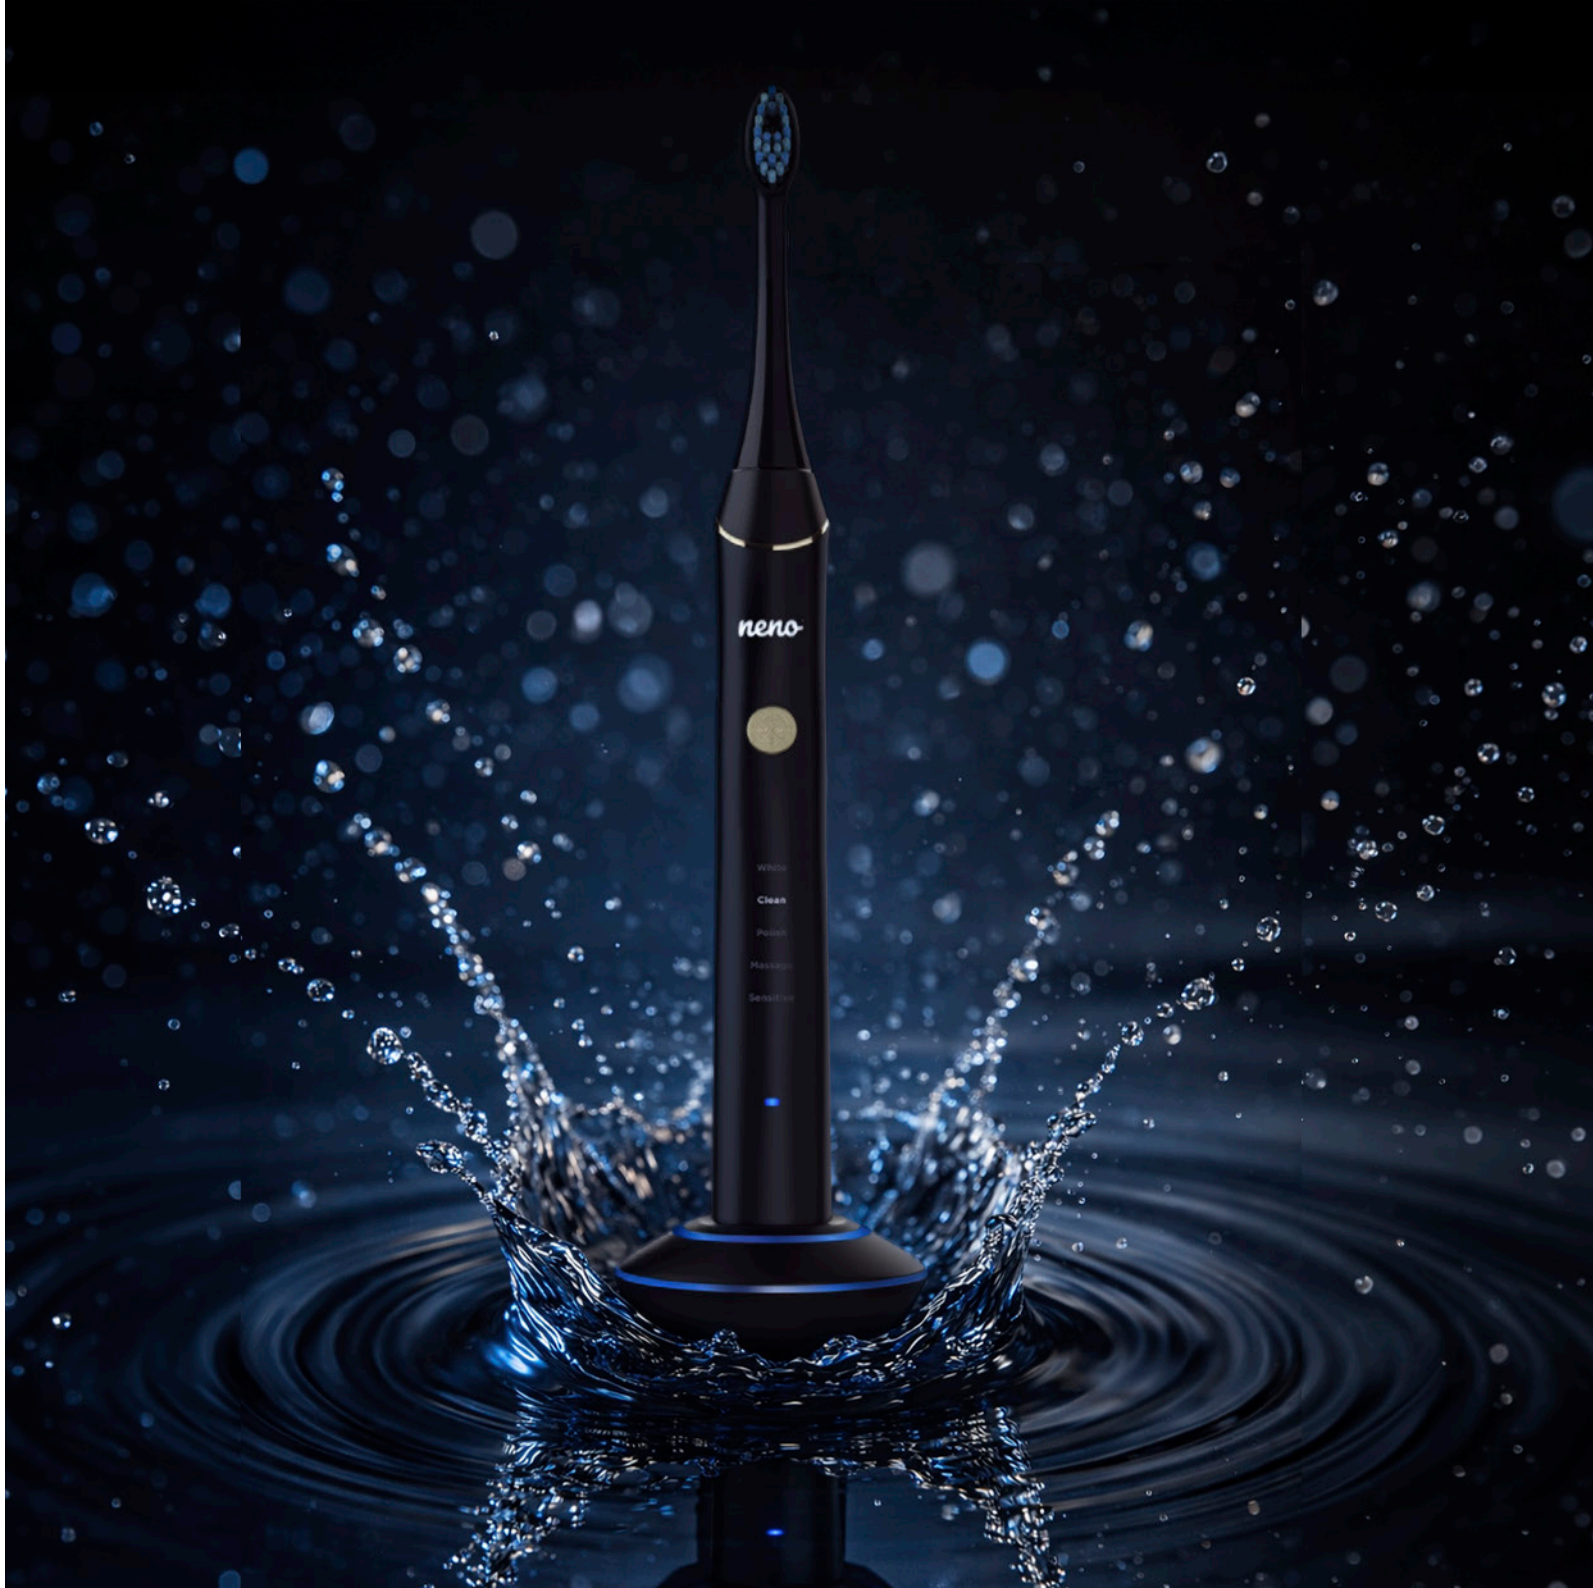

Memory Function

The Oriona electric toothbrush features an intelligent memory function that automatically remembers the last selected mode. This means that each time you use it, the device starts in exactly the same setting – without the need to cycle through modes again. Designed for everyday convenience, this feature saves time, simplifies morning and evening routines, and makes brushing smooth and intuitive. The memory function enhances comfort, especially once you have found your favorite mode and want to focus solely on effective oral care.

Elegant and Minimalist Design

The Neno Oriona sonic toothbrush has been refined down to the smallest detail. Slim and lightweight, it fits comfortably in the hand and looks stylish in any bathroom. It is designed for those who appreciate classic design, simplicity, and elegant aesthetics without unnecessary elements. The sophisticated combination of black and gold gives it a timeless character, allowing the Neno Oriona toothbrush to blend seamlessly into modern, well-designed bathroom interiors.

Flexi System

Our toothbrush is designed to clean teeth as effectively as possible while remaining gentle on the gums. To enhance this effect, the brush head is equipped with the Flexi System – a flexible rubber tip that gently absorbs pressure during brushing. It adapts to the gumline, minimizing the risk of irritation and increasing everyday comfort. The result is effective yet gentle cleaning that is both visible and noticeable from the very first use.
