Premium Hygiene System

Discover a new standard of everyday oral care with the Neno Oriona White sonic electric toothbrush. The advanced Premium Hygiene System provides comprehensive care for your teeth and gums, ensuring cleanliness, freshness, and comfort every day. Five operating modes allow you to tailor the brushing intensity to your individual needs. The automatic timer helps you maintain the dentist-recommended brushing time of exactly two minutes. Effective yet gentle brush heads with nylon bristles precisely clean teeth and the gum line, leaving a long-lasting feeling of freshness. A subtle LED indicator shows the battery status, while the included travel case lets you enjoy the same level of hygiene wherever you go.

31,000 Vibrations per Minute

The Neno Oriona White sonic toothbrush generates up to 31,000 vibrations per minute, delivering highly effective removal of plaque and food debris – even from hard-to-reach areas. This high vibration frequency sets not only the bristles in motion but also the mixture of toothpaste and water, creating microbubbles that reach interdental spaces and along the gum line. The result is thorough cleaning that remains gentle on enamel and sensitive oral tissues.

Built-in Timer

Each operating mode features a 2-minute timer in line with dental recommendations. Every 30 seconds, the toothbrush signals when it's time to move to another brushing area, helping ensure even and balanced cleaning of all tooth surfaces. This simple function supports proper brushing habits and enhances daily oral hygiene effectiveness.

IPX7 Waterproof Rating

Neno Oriona White has been designed with everyday comfort in mind. Its IPX7 waterproof rating makes the toothbrush resistant to splashes, moisture, and direct contact with water. You can safely use it in the shower or rinse it thoroughly under running water after brushing. The solid, sealed construction protects the internal components, ensuring durability and reliable performance.

Inductive Charging with LED Indicator

Charging the toothbrush is quick and intuitive – simply place it on the included charging base to start wireless inductive charging. The illuminated LED indicator shows when charging is in progress and turns off once the battery is fully charged, signaling that the device is ready for use. This convenient solution eliminates the need for cables.

Replaceable Nylon Brush Heads

The Neno Oriona White toothbrush comes with replaceable brush heads made from high-quality nylon bristles, recommended for sonic technology. The bristles are flexible, resistant to deformation, and easy to keep clean. A special rubber cross on the brush head enhances tooth polishing, while textured elements on the back help clean the tongue, supporting fresh breath. One replaceable brush head is included in the set.

Travel Case Included

A practical travel case is included, allowing for hygienic storage and safe transport of the toothbrush. It is designed to hold both the handle and the brush head, protecting them from dirt and damage. This makes it an ideal solution for travel, business trips, and everyday use on the go.

5 Operating Modes

Neno Oriona White offers five versatile brushing modes, making it easy to adapt the toothbrush to your current needs. The whitening mode helps reduce surface stains, the gentle daily mode is ideal for sensitive teeth and gums, and the start mode gradually increases vibration intensity to help new users adjust. An additional massage mode supports gum health, while the polishing mode smooths tooth surfaces, enhancing the feeling of cleanliness and freshness.

Memory Function

Neno Oriona White automatically remembers the last s elected mode, so each time you turn it on, it starts exactly the way you like it. This convenient feature streamlines your daily routine and lets you focus solely on effective brushing.

Elegant, Minimalist Design

Neno Oriona White impresses with its clean, elegant form and carefully refined details. Its slim shape and lightweight body ensure a comfortable grip and a stylish appearance in any bathroom. It's the perfect choice for those who value minimalist design and modern aesthetics in a subtle color palette.

Flexi System

For even greater comfort, the toothbrush is equipped with the Flexi System. The flexible rubber tip cushions brushing pressure and adapts to the natural contour of the gum line. This ensures effective yet gentle cleaning, minimizing the risk of irritation from the very first use.
