Freedom Series

Hands-free breast pump line

The Freedom Series breast pumps are an innovative solution designed for modern women. Lightweight, compact and fully wireless, they provide complete freedom while expressing milk – entirely hands-free. This is a breast pump that adapts to you – not the other way around. The hands-free design frees not only your hands, but also your mind, giving you space for a moment to yourself or your daily tasks. Because breastfeeding is not just about milk – it's about comfort, peace of mind and the confidence that you are doing it right.

Neno double breast pump controlled via an app

Neno Ovio Twin is a breast pump that can be operated using a dedicated mobile app. This double model allows you to express milk from both breasts simultaneously, and thanks to smartphone control you can conveniently adjust settings, monitor the session and record data without touching the device panel. Combining double pumping with smart app control ensures greater comfort, time savings and full control over the lactation process.

One of the first breast pumps on the market controlled by an app

neno[®] Luxury

Comfort and pain relief

The soft, flexible breast shield adapts to the breast – without pressure or pain.

Quiet as a whisper

Motor with a noise level of 32 dB.

Mobility and hands-free

The breast pump works, you stay free

Three modes

A suction system that mimics the natural rhythm of a baby.

Easy cleaning

Designed with hygiene in mind. Simple construction, complete cleanliness.

Application

Monitor milk expression and control the breast pump in the app.

Ultra-slim

Lightweight, discreet, and comfortable to wear.

Trust and security

Safe food-grade silicone, BPA free, REACH compliant.

App – control and time monitoring

Neno Ovio Twin is a double breast pump that works with the dedicated Neno app, allowing you to easily and intuitively manage your lactation routine. The device is controlled directly from your smartphone, so there is no need to use the pump's control panel, which increases convenience and discretion while expressing milk. The app enables you to measure and record the duration of each session, analyze them through clear charts and track progress. It also allows you to adjust the pump settings to suit your needs and stores the history of all pumping sessions, making it easier to plan your daily feeding routine. Additional support comes from a knowledge base with practical information that helps you better care for your lactation journey.

neno Luxury

Mimics a baby's natural sucking reflex

The three-phase operating system of the breast pump closely replicates a baby's natural sucking rhythm. The first phase consists of quick, gentle movements that stimulate milk flow. The device then transitions to a deeper expression phase that enables efficient milk extraction from both breasts simultaneously. In the final phase, the rhythm stabilizes and adapts to the natural pace of sucking, supporting effective and comfortable breast emptying.

Phase I – Stimulation Mode

Intense, rapid pulsations that stimulate milk flow.

Phase II – Deep Expression Mode

Slower, deeper movements that allow effective milk expression.

Phase III – Mixed Mode

Especially helpful in cases of low milk supply. The third phase stimulates lactation by mimicking the way an infant sucks – the breast is thoroughly emptied and the milk ducts are stimulated to work.

nenor Luxury

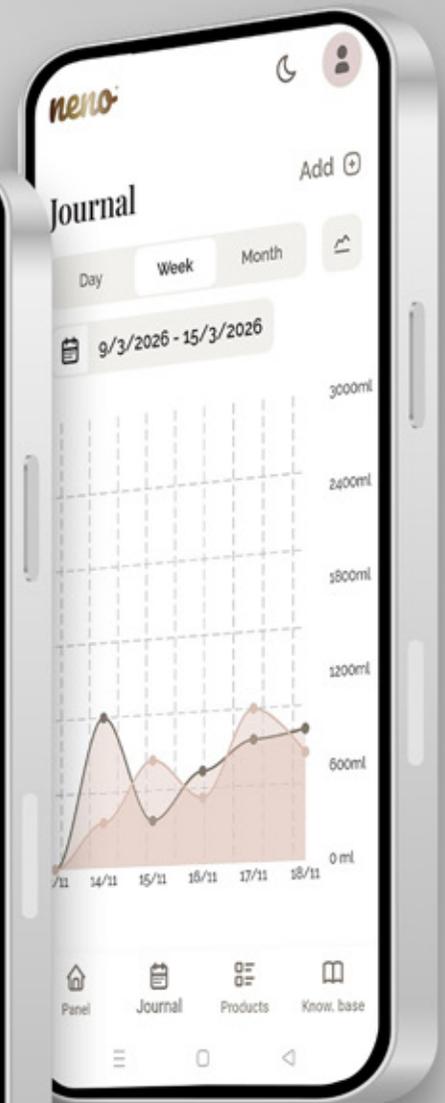

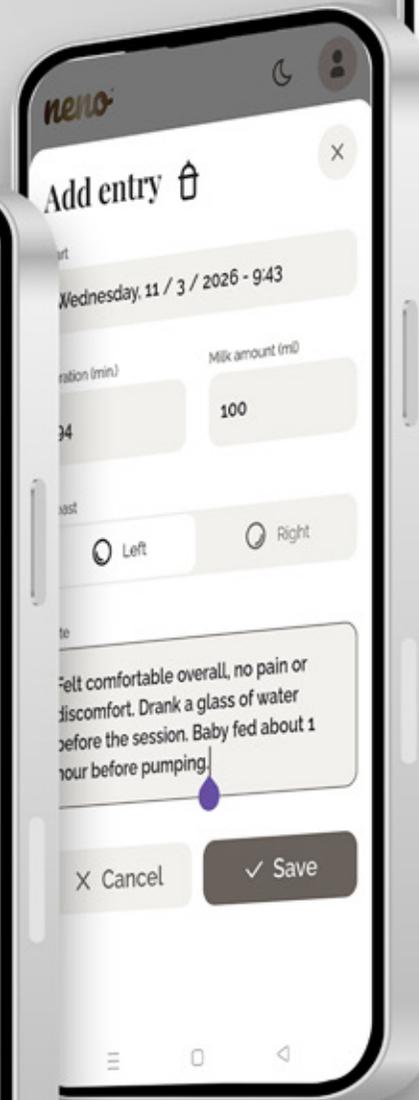

Lactation monitoring and notes

Would you like to better understand your lactation process and plan pumping sessions more easily? With the Neno Ovio Twin double breast pump and the dedicated Neno app, you can conveniently track the most important information from each session. The app allows you to monitor the amount of milk expressed from both breasts, the duration of pumping and add your own notes to observe changes in lactation. All data is stored in one place and presented in clear charts, making it easier to analyze progress and better understand your body's rhythm. This allows you to consciously manage lactation and adapt your pumping schedule to your daily needs.

 Note

нено Luxury

Lightweight and portable

The compact design makes it easy to fit the pump components into a stroller bag, backpack or handbag, so you can take the breast pump with you wherever you go. Its lightweight form and ergonomic shape make everyday use comfortable, while the intuitive operation allows you to start a pumping session quickly. The breast pump shells are slim and almost invisible under clothing, allowing you to express milk discreetly even during everyday activities while maintaining comfort and freedom of movement.

neno Luxury

Closed system

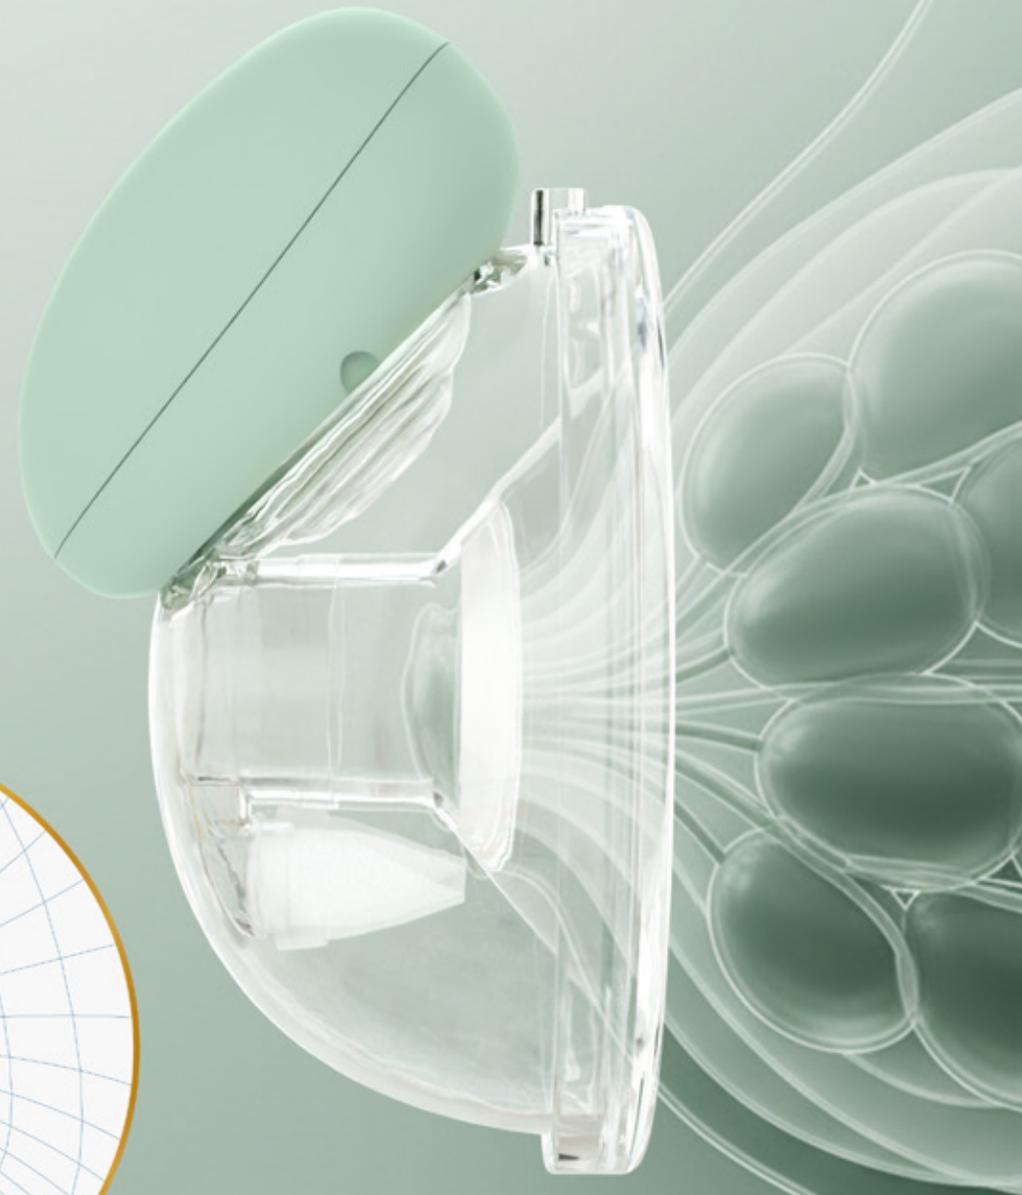

The Neno Ovio Twin double breast pump is equipped with a closed system that effectively prevents expressed milk from flowing back into the device. A specially designed valve blocks backflow, while an additional membrane protects the pump mechanism from moisture. This solution helps maintain a high level of hygiene, increases safety during use and supports reliable operation when expressing milk from both breasts simultaneously. As a result, you can be confident that all pump components operate in properly protected and stable conditions.

neno Luxury

Anatomical breast shields

The anatomically shaped breast shields are designed to naturally adapt to the shape of the breast. Their form ensures a secure fit against the body, supporting comfortable and effective milk expression from both breasts at the same time. The stable fit helps maintain the correct position during the session, eliminating the need for frequent adjustments or repositioning. This solution increases comfort and allows you to focus on a calm and efficient pumping process.

nenor *Luxury*

Soft shield material

The breast shields in the Neno Ovio Twin double breast pump are made of soft, high-quality silicone that is gentle on the skin and enhances comfort while expressing milk. The flexible material adapts to the shape of the breast, supporting comfortable use during each session. The smooth silicone surface is easy to clean, and the material is safe for food contact, helping maintain proper hygiene and giving mothers peace of mind while using the pump.

neno Luxury

Adjustable size

The Neno Ovio Twin breast pump can be adapted to the individual needs of every mother. The set includes breast shield reducers in sizes 21 mm, 19 mm and 17 mm, allowing precise adjustment of the diameter to the nipple size. Proper sizing improves comfort when expressing milk from both breasts, enhances pumping efficiency and ensures that even frequent sessions remain comfortable.

neno Luxury

Small and discreet

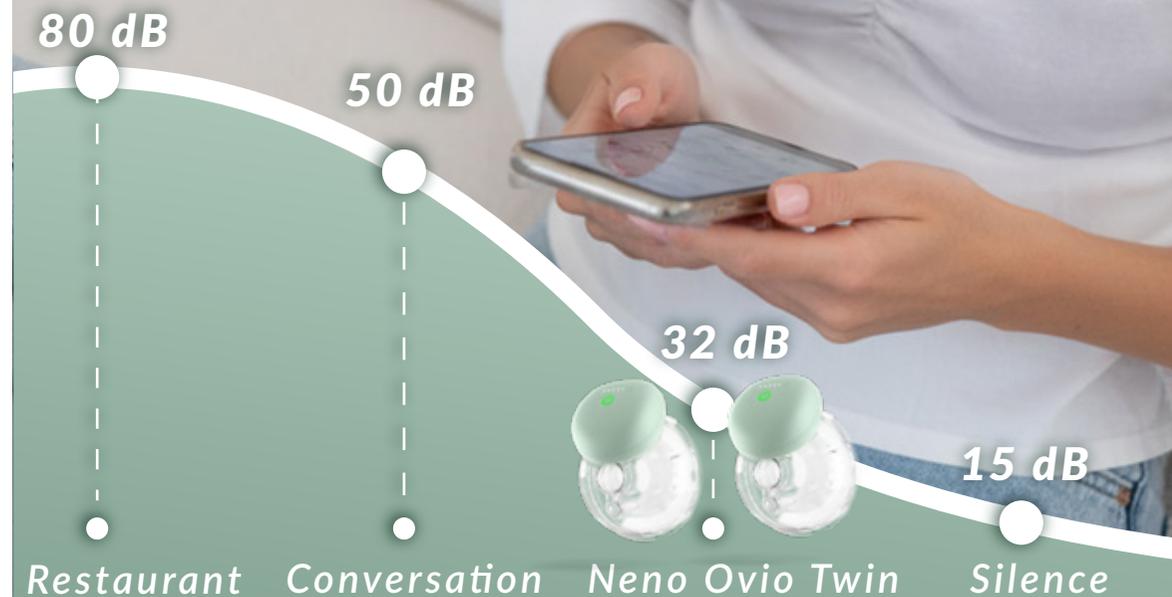

Neno Ovio Twin features a compact design and discreet appearance, making it convenient to use in many situations. The slim breast shells fit comfortably under clothing and remain almost invisible, providing comfort and full discretion during pumping. At the same time, despite their compact size, they offer a large capacity, allowing longer pumping sessions from both breasts without frequent emptying. This makes the device practical both at home and on the go – at work or while traveling.

neno Luxury

Quiet and discreet operation

The device operates very quietly, with a noise level of only 32 dB, making it almost inaudible during use. This allows you to comfortably express milk from both breasts at any time of the day or night without worrying about waking the baby or drawing attention. The discreet operation of the Neno Ovio Twin breast pump provides greater freedom and allows you to use it calmly at home and in public places.

neno *Luxury*

Easy milk pouring

The openings in the Neno Ovio Twin breast pump shells are designed to make transferring expressed milk convenient and efficient. The specially shaped opening allows you to quickly pour milk directly into a bottle or storage bag. The controlled flow helps reduce the risk of spilling and losing valuable drops of milk. This makes the entire process more hygienic and comfortable, and preparing milk for feeding or storage takes much less time.

neno Luxury

Lids and stands

The Neno Ovio Twin double breast pump set includes practical lids and stable stands that enhance everyday comfort and hygiene. The lids protect the inside of the shells from dust and other contaminants, ensuring that the elements in contact with milk remain properly protected during storage and transport. The dedicated stands allow both devices to be safely placed on a flat surface, reducing the risk of tipping over and accidentally spilling milk. These practical solutions make everyday use of the breast pump easier.

neno Luxury

Set contents

With the Neno Ovio Twin double electric breast pump, you receive a complete set of accessories that allows convenient milk expression both at home and on the go. The package includes two pumping devices, 24 mm silicone breast shields and reducers in sizes 17 mm, 19 mm and 21 mm for optimal nipple fit. The set also includes breast shield covers, membranes and valves, two 180 ml milk containers with stands, a USB-C charging cable and a user manual. Additionally, an elegant velvet storage pouch and breast pads are included, allowing you to start using the pump immediately after unpacking and enjoy comfort, hygiene and full readiness in any situation.

neno *Luxury*

Large capacity

Each breast pump shell of the Neno Ovio Twin has a capacity of up to 180 ml, allowing you to express a larger amount of milk during a single session without the need to empty the container while pumping. This makes the entire process smoother and more comfortable, allowing the mother to focus on expressing milk without unnecessary interruptions. The large capacity increases efficiency and makes the pump ideal both for home use and during short breaks throughout the day, for example at work.

neno Luxury

Quick cleaning

The components of the Neno Ovio Twin double breast pump are designed for easy and fast hygiene maintenance. The simple construction and smooth surfaces allow all parts to be thoroughly washed under running water using a mild detergent. Individual elements can also be sterilized in devices designed for disinfecting baby accessories, ensuring a high level of cleanliness without spending much time on maintenance.

neno Luxury

Sterilization

The individual components of the Neno Ovio Twin double breast pump can be easily sterilized, helping maintain a high level of hygiene with every use. Parts that come into contact with milk are made of materials resistant to high temperatures, allowing them to be safely boiled or disinfected in sterilizing devices intended for baby accessories. Regular sterilization helps keep all elements clean and ensures that the expressed milk remains properly protected before feeding the baby.

neno Luxury

Easy storage

The set includes a soft, elegant velvet pouch that allows hygienic storage of all pump components. Thanks to it, the breast pump can be conveniently packed into a handbag, backpack or suitcase and always kept within reach whenever pumping is needed. The pouch protects accessories from dust, dirt and minor damage while also helping keep everything organized and ready for transport.

neno Luxury

Perfect gift

Looking for a practical gift for an expectant mother? The Neno Ovio Twin double, 3-phase electric breast pump with app is a modern device that truly supports women during the lactation period. Thanks to the ability to express milk from both breasts simultaneously, intuitive operation and convenient app control, the pump makes everyday feeding routines easier to manage. Functional accessories and a thoughtfully designed structure make it not only a practical device but also a meaningful gift that shows care and helps a new mother feel more comfortable and supported in her new role.
