Rivo

Formula Milk Maker

3in1

- ♥ Boiling water
- ♥ Heating water
- ♥ Maintaining temperature

Night mode

- ♥ Night light
- ♥ Silent mode

Ready to use

- ♥ Access to running water

Fits most bottles

Neno Rivo is designed to be compatible with various types of bottles, so you don't have to change your current accessories. It's convenience and flexibility that make everyday feeding easier – you can use what you already know and like.

Time-saving – hot water in just a few minutes

Neno Rivo provides access to perfectly heated water exactly when you need it. No waiting for boiling and cooling – it only takes a moment to prepare milk for your baby quickly and stress-free. This is a huge convenience, especially at night or in situations when immediate action is needed. You save time, gain peace of mind, and know everything is ready at the right moment.

Perfectly adjusted temperature

Neno Rivo offers up to 66 temperature settings within a precise range, allowing you to perfectly match the water temperature to your baby's needs and the type of formula. No guessing – you choose the exact value and can be sure everything is prepared according to recommendations. It's convenience that gives you full control, eliminates mistakes, and makes daily feeding much easier.

Cleaner water, greater peace of mind

Take care of water quality with the de-chlor function, which reduces chlorine content before preparing milk. This solution improves both quality and comfort of everyday use of Neno Rivo – without extra steps or additional devices. With the de-chlor function, you can be sure the water used for feeding is perfect in every way.

Ready faster than you think

With Neno Rivo, preparing milk is much faster and easier than the traditional method. Simply add formula, and the device takes care of the rest – exactly the right amount of water flows into the bottle at the perfect temperature. No boiling, cooling, or checking needed – everything is under control in seconds. It's a huge time-saver and a real convenience, especially when your baby needs feeding immediately.

Measure exactly what you need

The Neno Rivo formula milk maker allows precise water dosing, so you always prepare exactly the amount you need. No spilling, guessing, or wasting. It gives you greater control over every meal – especially important when feeding infants. Each portion is perfectly matched, giving you confidence that everything is done exactly right.

One-touch control – convenient panel with lock

Neno Rivo features a modern touch panel that lets you set all parameters with a single touch. The clear interface makes it easy to use, even at night. An additional lock protects settings from accidental changes. It's comfort that simplifies everyday life and reduces unnecessary stress.

Quick and effortless operation

Neno Rivo is designed to make daily feeding easier. You don't waste time learning complicated functions or performing multiple steps – everything works intuitively and exactly as you need it. It's real time and energy savings, giving you more space for what matters most – closeness and care for your baby.

Use tap water directly

With Neno Rivo, you can use running tap water – all you need is access to a faucet to have water ready for preparing milk in moments. This is a major convenience appreciated by busy parents.

Ready settings for greater convenience

Neno Rivo offers 4 preset modes designed for the most common needs when preparing water for formula. You don't have to set parameters from scratch every time – just choose the appropriate mode, and the device does the rest. It's a solution that significantly speeds up everyday tasks and gives you more time for other activities.

One device, many possibilities

The Neno Rivo formula milk maker combines three functions: boiling water, heating, and maintaining temperature. This means you don't need multiple devices or extra steps – everything is in one place, always ready to use. Additionally, the device includes protection against excessive temperature – it will not allow water hotter than the selected setting to be dispensed. This ensures convenience, control, and peace of mind, allowing you to prepare water safely and exactly as needed.

Stress-free night feeding

Night Mode in Neno Rivo is designed for nighttime feeding. It allows you to prepare water quickly without turning on bright lights or making unnecessary noise. It's a feature that helps you act efficiently even in the middle of the night – without stress and without waking the whole household.
