3-PHASE HANDS FREE
ELECTRONIC BREAST PUMP

Freedom Series

nenob[®] *Luxury*

neno® *Freedom Series*

The hands-free breast pump range.

The Freedom Series is an innovative solution designed with modern women in mind. These lightweight, compact and fully wireless breast pumps offer freedom whilst expressing milk – hands-free.

This is a breast pump that adapts to you – not the other way round. The hands-free design frees up not only your hands but also your mind, giving you space for a moment to yourself or to tackle your daily chores.

Because feeding is not just about milk – it's about comfort, peace of mind and the confidence that you're doing it right.

neno® *Luxury*

12 suction levels – complete control over pumping

Neno Belisa is a **single wearable breast pump from the hands-free series**, offering up to 12 suction levels and 3 pumping phases, making it easier to adjust the device to your current stage of lactation and personal preferences. Gentle stimulation helps prepare the breasts for milk expression, the deep pumping phase supports efficient milk extraction, while the mixed mode combines the benefits of both settings. The wide adjustment range allows you to find the most comfortable rhythm, whether you pump regularly or only occasionally.

neno *Luxury*

The largest flange in the neno range and 4 inserts included

The Neno Belisa single wearable breast pump comes equipped with a 27 mm flange – the largest available in the Neno range – **expanding fitting options for women with different needs**. The set also includes four flange inserts: 24 mm, 21 mm, 18 mm, and 15 mm, allowing for a more precise fit to the nipple size. This solution enhances comfort, reduces pressure and pulling sensations, and supports efficient milk expression regardless of the stage of lactation.

***Large
collection
cup capacity
– more
convenience
every day***

Neno Belisa features collection cups with a generous capacity of 180 ml, allowing you to express more milk without the need for frequent emptying. This practical solution is especially beneficial for mothers with abundant milk supply and during longer pumping sessions. **The larger capacity provides greater freedom and lets you focus on daily tasks** without constantly checking the amount of milk collected. It is also ideal for use outside the home – at work, while traveling, or during walks – when discretion, convenience, and fewer interruptions matter most.

neno *Luxury*

Up to 3.5 hours of operation on a single charge

Longer battery life means fewer interruptions and greater comfort during everyday pumping. The **Neno Belisa single wearable breast pump operates for up to 3.5 hours** on a single charge, making it perfect for use at home, at work, while traveling, or on the go. The extended operating time reduces the need for frequent charging, while the USB-C port allows you to recharge the device conveniently from a wall socket, power bank, laptop, or car charger.

neno *Luxury*

Stylish storage case – organization and elegance in one

The breast pump comes packed in an elegant zippered case that immediately highlights the premium character of the set. **Practical compartments help keep all accessories neatly organized,** making it easy to store the Neno Belisa single wearable breast pump at home or take it with you on a business trip or vacation. This stylish and functional solution simplifies organization, protects accessories from dirt, and ensures the entire set looks exceptionally elegant.

neno *Luxury*

Soft and gentle silicone for your comfort

The flange is made from soft silicone, making the Neno Belisa single wearable breast pump comfortable against the skin and enhancing the overall pumping experience. **The flexible material gently adapts to the shape of the breast,** reducing pressure and pulling sensations. This is particularly important for mothers who pump regularly and value both efficiency and comfort.

neno *Luxury*

3 pumping phases – inspired by a baby's natural sucking rhythm

The third pumping phase combines shorter, gentler stimulation movements with a stronger expression rhythm to better imitate a baby's natural sucking pattern. As a result, the **Neno Belisa hands-free breast pump helps smoothly transition from stimulating milk flow** to effective milk expression. This solution increases comfort and makes pumping feel more natural and better suited to a mother's needs.

Phase I – Stimulation Mode

Intense, rapid pulsations that stimulate milk flow.

Phase II – Deep Expression Mode

Slower, deeper movements that allow effective milk expression.

Phase III – Mixed Mode

Especially helpful in cases of low milk supply. The third phase stimulates lactation by mimicking the way an infant sucks – the breast is thoroughly emptied and the milk ducts are stimulated to work.

neno *Luxury*

Easy milk transfer – convenient and spill-free

A specially designed pouring opening in the collection cup makes it quick and easy to transfer expressed milk into a bottle or a milk storage bag. Thanks to this feature, the **Neno Belisa single wearable breast pump** helps minimize the risk of spilling valuable breast milk and allows for faster preparation of milk for feeding, refrigeration, or freezing. This saves time and helps maintain a cleaner environment after each pumping session.

neno *Luxury*

Stable and compact collection cup

The stable design of the collection cup allows it to be placed securely on a flat surface during breaks without worrying about accidental spills.

The compact shape of the Neno Belisa single wearable breast pump also makes everyday use, storage, and milk handling more convenient. It is a practical solution that provides mothers with greater freedom and peace of mind during every pumping session.

neno *Luxury*

***Lightweight
and discreet –
pump
comfortably
without
restrictions***

The Neno Belisa hands-free breast pump is lightweight and compact, fitting comfortably inside a bra and allowing for discreet milk expression. **Its ergonomic shape adapts well to the breast**, does not restrict movement, and makes pumping easier in everyday situations, both at home and on the go. It is an ideal solution for mothers who value freedom, convenience, and privacy while expressing milk.

neno *Luxury*

Easy cleaning and hygiene after every use

The components of the Neno Belisa single wearable breast pump are easy to clean and sterilize, helping maintain proper hygiene during daily pumping. **The simple design allows for quick disassembly, sterilization, and preparation for the next session,** enabling mothers to use the pump conveniently and without unnecessary effort.

neno *Luxury*

Simple operation – convenient from the very first use

The clear display allows you to quickly check current settings, while the intuitive buttons make it easy to adjust suction levels or switch between pumping phases. Thanks to this, the Neno Belisa single wearable breast pump is intuitive to use and enables mothers to tailor the device to their individual needs.

All settings can be adjusted quickly and conveniently without interrupting the pumping session.

neno *Luxury*

A practical and stylish baby shower gift

A breast pump is one of the most **practical gifts** you can give an expectant mother at a baby shower. The Neno Belisa hands-free breast pump supports everyday milk expression, provides greater freedom, and helps mothers adapt more easily to life after childbirth. Its elegant design, functional accessories, and stylish storage case make it a beautiful gift that not only looks impressive but also genuinely meets the needs of a new mother.
