Adjust the Rocking Motion to Your Baby's Needs

The Neno Averta electronic stroller rocker offers 3 rocking intensity levels, allowing you to easily adjust its operation to your baby's mood and needs. Gentle rocking helps soothe your little one, calm them before sleep, or provide greater comfort during walks. Depending on the situation, you can choose a subtle motion or a slightly stronger rocking effect, ensuring the device works exactly as needed. **Our intelligent stroller rocker helps calm your baby quickly, without the need to constantly rock the stroller by hand.**

Greater Peace of Mind with 2 Operating Modes

Neno Averta features 2 operating modes that help adapt the device to your child's current needs. The standard mode provides automatic stroller rocking, supporting your baby's daily relaxation and sleep routine. The soothing mode is enhanced with additional sound functions that create a calming atmosphere. You can choose a heartbeat sound combined with rocking, ocean wave sounds, or one of 9 melodies, including water sounds, birdsong, and seven lullabies. Thanks to these features, **this intelligent electric stroller rocker helps soothe your baby faster** and provides greater comfort both at home and during walks.

Customize Rocking Time with the Timer Function

The timer function allows you to set the operating time to 15, 30, or 45 minutes, making it easy to adjust the rocking duration to your needs. **You can select the option best suited for bedtime, pre-nap relaxation, or a short rest during the day.** Once the selected time has elapsed, the device automatically switches off, so there is no need to stop it manually. This gives you a moment for yourself while your baby enjoys gentle, soothing rocking.

Intelligent Cry Detection Function

The intelligent cry sensor automatically detects your baby's cries and activates soothing rocking to help them settle more quickly. **This practical feature is especially helpful when your child needs comforting** and your hands are occupied. By responding to your baby's needs, the rocker helps restore a sense of calm without requiring you to immediately attend to the stroller.

2 Color Variants – Match the Rocker to Your Stroller

Neno Averta is available in two color options, making it easy to match the device to your stroller and other baby accessories.

Its stylish appearance complements everyday walks, while the compact design takes up very little space. It is a practical solution for parents who value both functionality and refined design.

Versatile Use – Support Beyond Walks

Neno Averno is **not only an intelligent stroller rocker but also a practical aid for calming your baby at home.** It can be attached to a stroller to provide gentle motion during walks or used with a standard crib. One compact device supports your daily routine in various situations – during walks, naps, and quiet moments throughout the day.

Soothing Mode – Calming Sounds and Vibrations

The soothing mode helps create a peaceful environment that encourages relaxation and rest. The device offers a variety of comforting sounds, including a heartbeat, ocean waves, water sounds, birdsong, and 7 lullabies, helping to calm your baby both indoors and outdoors. Additionally, **you can activate the vibration function to further tailor the device** to your child's needs and enhance comfort during sleep or rest.

BT Connectivity – Favorite Sounds Always Within Reach

Thanks to BT connectivity, **you can connect Neno Averta to your smartphone** and play your baby's favorite music, lullabies, or other soothing sounds. This feature allows you to create a relaxing atmosphere and easily adapt the audio experience to your child's current needs.

Adjustable Strap – Quick and Easy Installation

The adjustable strap makes installing Neno Averta quick, simple, and convenient. Just adjust the strap length to fit the mounting location and securely attach the device to a stroller, rocker, or crib. The strap also helps keep the device in the correct vertical position. **Proper installation is important for optimal performance,** so it is recommended to ensure the rocker is mounted securely and according to the instructions. This allows you to enjoy all of its features during walks and while your baby is resting.

IPX4 Water Resistance

The IPX4 water resistance rating protects **Neno Averta** against **splashes and light rain, allowing you to use the device even in changing weather conditions.**

This practical feature enhances the comfort of everyday walks and lets you enjoy the rocking and sound functions outdoors with greater confidence.

Cordless Operation – Convenience Without Cables

Neno Averta operates wirelessly, giving you complete freedom during walks, naps, and daily relaxation moments. **USB-C charging is quick and convenient**, while the 6–8-hour battery life allows for extended use without frequent recharging.
