IONIC AIR  
STRAIGHTENER

**AIR** STRAIGHTENING

*Exclusive Series*

# Fast and safe hair straightening

Neno Beauty Avela is a highly effective ionic air straightener designed for all hair types. This innovative device is an excellent alternative to traditional straighteners – it dries and smooths hair at the same time, reducing the risk of hair damage thanks to a stream of warm or cool air. It is equipped with a range of practical features that help achieve sleek and smooth hair, whether used on wet or dry strands. Neno Beauty Avela offers, among others, a memory function, 2 operating modes, 3 airflow speed levels, and automatic shut-off. It is a next-generation intelligent air straightener that tames hair while providing smooth, shiny, and healthy-looking strands without frizz or static.

## *Straighten and dry your hair at the same time*

Tired of long and exhausting hair styling? Want to save time without giving up sleek and shiny hair? Try the new hair device from the **Neno Beauty series – the Avela air straightener**, which dries and straightens hair simultaneously. Thanks to its airflow technology, the device works as both a hair dryer and a straightener at the same time. Less frizz, natural volume, smoothness, and shine. Your hair remains healthy and flexible without the risk of heat damage.

*Exclusive Series*

# *Straight hair without overheating*

Neno Beauty Avela is an ionic air straightener that smooths hair without overheating it. Air styling is a safer alternative to traditional straighteners that can damage and dry out hair. The maximum straightening temperature is 160°C, helping protect hair from overheating and damage. The ionization function keeps hair cuticles closed, preventing moisture loss while maintaining natural volume. No hot plates, overheating, or risk of hair damage.

# *Wet hair straightening function*

Neno Beauty Avela can be used on wet hair, successfully replacing a traditional hair dryer. It is a convenient and fast 2-in-1 solution that helps save time. Neno Beauty Avela dries and straightens your hair simultaneously right after washing. **The wet hair mode offers 3 temperature levels:** 160°C, 140°C, and 120°C, along with 3 airflow speed settings. Higher temperatures work well for thick and hard-to-style hair, 140°C-120°C is ideal for normal hair, while the lower temperature is best for thin and delicate strands.

# *Dry hair straightening*

Neno Beauty Avela also allows dry hair straightening, offering 3 temperature levels and 3 airflow speed levels tailored to different hair types. The 120°C setting is suitable for thick and unruly hair, 110°C is ideal for normal hair, while 80°C is designed for thin and delicate strands. **With various settings, you can easily adjust the styling intensity to your hair's needs,** minimizing the risk of dryness and overheating.

# *Ultra-fast powerful brushless motor*

The brushless motor generating up to 110,000 RPM ensures intensive and stable airflow, **allowing faster drying and straightening** without unnecessarily prolonging styling time. Thanks to its high efficiency, the device handles both fine and thicker hair effortlessly, helping save time and giving your hairstyle ideal volume.

## *Cool airflow for smoother and shinier strands*

The cool airflow function helps seal the hair cuticles, making hair shinier and less prone to frizz. It also helps maintain the styling effect for longer-lasting results. **Cool air is ideal for finishing the straightening process, especially for thin and delicate hair.**

# ***Ionization***

*for healthier and more cared-for hair*

The Neno Beauty Avela air straightener is equipped with negative ion technology that helps improve hair condition. **The generated negative ions make hair smoother**, better defined, and less prone to static and frizz. Ionization works especially well for high-porosity, thin, or color-damaged hair. Thanks to this feature, hairstyles gain a softer and shinier finish.

## Convenient control with the LCD display

Straightening and drying your hair has never been easier. The intuitive LCD display makes operating the Neno Beauty Avela comfortable from the very first use. **The screen shows current settings** such as temperature, airflow level, and the selected mode for wet or dry hair. This allows you to monitor the styling process in real time and adjust the device to your hair type and needs.

## *Safe use thanks to automatic shut-off*

Neno Beauty Avela is equipped with features that enhance styling comfort and support more conscious daily use. When the arms remain open, the device enters standby mode after 10 seconds, and the airflow speed icon appears on the display. Operation resumes automatically once the arms are closed again, **allowing you to continue styling without resetting the device.** Additionally, Neno Beauty Avela automatically turns off after 3 minutes of inactivity with the arms open, providing greater peace of mind during use.

# *Arm lock* *convenient storage* *and hair dryer function*

Once the arms are locked, Neno Beauty Avela can also function as a hair dryer, allowing you to dry and smooth your hair with a single device while saving space in the bathroom and time during daily styling. The arm lock **makes storing the device easier and helps it take up less space in a drawer**, cosmetic bag, or suitcase. After styling, simply lock the arms in the closed position to protect the device from accidental opening and make it more convenient for travel.

## *Easy cleaning with minimal effort*

Neno Beauty Avela has been designed for quick and convenient maintenance. The removable filter cover makes it easy to regularly remove dust and dirt, while the automatic cleaning function helps keep the device in good condition for longer. After 24 hours of use, the display shows an indicator informing you that cleaning is required. Activating the reverse airflow function helps remove accumulated dirt, and the entire process takes only 20 seconds. Thanks to this feature, the device maintains optimal performance and durability over time.

# *Memory function for your preferred settings*

*Neno Beauty Avela remembers the last used settings, allowing you to start styling faster next time without reselecting parameters. It is a convenient solution that saves time and simplifies daily styling, especially if you regularly use the same temperature and airflow settings.*

# *Hair care series by Neno Beauty*

The Neno Beauty hair care series is a line of modern devices created for conscious hair care and everyday styling. The products combine ease of use with advanced technologies that help protect hair and support its condition and appearance every day. It is a perfect choice for people who want to care for their hair in a thoughtful, effective, and gentle way. Neno Beauty Avela also comes with a practical storage pouch that helps protect the device from dirt and scratches.
