neno[®] Freedom Series

The Freedom Series hands-free breast pump line

The Freedom Series is an innovative solution designed for modern women. Lightweight, compact, and completely wireless, these breast pumps provide true freedom while expressing milk – no hands required.

This is a breast pump that adapts to you – not the other way around. The hands-free design frees not only your hands but also your mind, giving you more time and flexibility for daily tasks or a well-deserved moment for yourself.

Because feeding is about more than just milk – it's about comfort, peace of mind, and the confidence that you're doing it right.

12 Suction Levels – Tailor Pumping to Your Needs

Neno Belisa Twin is a double wearable breast pump designed to offer maximum flexibility and personalization. With 12 suction levels and 3 pumping modes, you can easily adjust the pumping experience to match your individual needs and stage of lactation. The stimulation mode gently encourages milk flow, the expression mode helps efficiently collect milk, and the mixed mode combines both rhythms for greater comfort throughout the session. This allows you to find the settings that work best for your body, whether you pump regularly or only occasionally.

neno *Luxury*

The Largest Flange in the Neno Range – For an Even Better Fit

Neno Belisa Twin comes equipped with Neno's largest flange size – 27 mm – allowing for an even more personalized fit. The set also includes four flange inserts in sizes 24 mm, 21 mm, 18 mm, and 15 mm, helping you precisely match the flange to your nipple size. Proper fit improves both comfort and pumping efficiency throughout different stages of lactation.

Spacious Collection Cups – Greater Convenience During Pumping

Neno Belisa Twin features two collection cups with a capacity of 180 ml each, allowing you to express larger amounts of milk without frequently interrupting your session to empty the containers. This practical solution is especially beneficial for mothers with an abundant milk supply or those who pump for extended periods. The generous capacity offers greater freedom and lets you focus on your daily activities without constantly monitoring the milk level. It is also ideal for pumping away from home – at work, while traveling, or during walks – when discreet and uninterrupted pumping is especially important.

neno *Luxury*

Longer Battery Life on a Single Charge

Extended battery life provides greater flexibility and allows you to pump with fewer interruptions. Neno Belisa Twin operates for up to 3.5 hours on a full charge, making it suitable for use both at home and on the go – at work, while traveling, or during outings. The built-in USB-C port enables convenient charging from various power sources, including wall outlets, power banks, laptops, and car chargers.

neno *Luxury*

Elegant Storage Case for Better Organization

Neno Belisa Twin comes packaged in a stylish zippered storage case that immediately highlights the premium character of the set. Practical compartments help keep all accessories organized in one place, making it easy to store the breast pump at home or take it with you on business trips and vacations. The case protects the device from scratches while ensuring all components remain within easy reach.

neno *Luxury*

Soft Silicone Designed for Comfort

The flanges are made of soft silicone that feels gentle against the skin and enhances comfort during pumping. The flexible material fits comfortably around the nipple, helping to prevent pressure and pulling sensations. This is particularly important for mothers who use a breast pump regularly.

neno *Luxury*

A Natural Rhythm in 3 Modes

The third pumping mode combines shorter, gentler stimulation cycles with stronger expression suction, closely replicating a baby's natural sucking rhythm. This allows Neno Belisa Twin to smoothly transition from stimulating milk flow to efficient milk expression. The result is a more natural pumping experience that better meets a mother's individual needs.

Phase I – Stimulation Mode

Intense, rapid pulsations that help stimulate milk flow.

Phase II – Expression Mode

Slower, deeper suction cycles designed to effectively express breast milk.

Phase III – Mixed Mode

Especially helpful in cases of low milk supply. The third phase stimulates lactation by mimicking an infant's natural sucking pattern.

Clean and Convenient Milk Transfer

The collection cups feature a specially designed pouring spout that allows milk to be transferred directly into a bottle or milk storage bag quickly and easily. This practical solution helps minimize spills and makes it easier to prepare milk for feeding, refrigeration, or freezing. Not only does it save time, but it also helps keep the entire pumping process neat and organized.

neno *Luxury*

Stable Collection Cups with a Compact Design

The collection cups are designed to rest securely on flat surfaces whenever you need to pause your pumping session. Their stable construction helps prevent accidental spills, while the compact design makes everyday use, storage, and preparation for the next session more convenient.

neno *Luxury*

Effortless Pumping Without Limitations

Lightweight and compact, Neno Belisa Twin fits comfortably inside your bra, allowing for discreet, hands-free milk expression. Its ergonomic shape adapts naturally to the breast without restricting movement, making it suitable for daily use both at home and outside. Mothers who value comfort and privacy during pumping will particularly appreciate this model.

neno *Luxury*

Easy Daily Cleaning

The components of Neno Belisa Twin can be easily cleaned and sterilized, helping you maintain proper hygiene every day. Its simple construction allows for quick disassembly, thorough cleaning, and easy reassembly. As a result, mothers save time, reduce effort, and can rely on the breast pump whenever they need it.

neno Luxury

Intuitive Operation from the Very First Session

The clear display allows you to quickly check current settings, while convenient buttons make it easy to adjust suction levels and pumping modes. Neno Belisa Twin is designed for effortless everyday use, enabling mothers to personalize the pumping experience without interrupting the session. All settings can be changed quickly and conveniently at any time.

The Perfect Baby Shower Gift

A breast pump is one of those baby shower gifts that can provide meaningful support to a new mother after childbirth. Neno Belisa Twin makes daily milk expression easier, offers greater freedom through hands-free operation, and helps mothers adapt to their new role with confidence. Its elegant finish, practical accessories, and stylish storage case make it a beautiful gift that also meets the real everyday needs of a young mother.
