Precise monitoring of your child's weight and growth

Neno Integro is a smart scale for infants and adults, paired with a dedicated app that helps you conveniently monitor your child's development from the very first days of life. The device is especially useful for babies with a low birth weight, for whom regular weight and growth monitoring is particularly important. **With Neno Integro, parents can easily track their little one's progress between pediatric visits, gaining greater peace of mind in everyday care.** The removable tray with a printed measuring scale allows you to quickly check your child's body length, eliminating the need for additional accessories or separate weight and height measurements.

Measurement results always within reach with the Neno app

Thanks to BT connectivity, Neno Integro can be paired with the Neno app, allowing you to conveniently save measurement results and monitor your child's development on an ongoing basis. All data is stored in one place, making it easy to track changes in your baby's weight and length over days, weeks, and months. The app enables you to follow progress over time, analyze key parameters, and use growth percentile charts to better observe your child's growth rate. It is a practical tool for parents who want quick access to measurement history and a reliable way to monitor their child's development.

Convenient weighing with easy and intuitive operation

Neno Integro is an app-connected scale designed to make daily weighing quick, convenient, and hassle-free for the entire family. **The clear display allows you to easily read measurements in kilograms or pounds**, while the low-battery indicator helps prevent unexpected interruptions. With a single press, you can change the display orientation, activate the tare function, switch weight units, or enable measurement stabilization. After one minute of inactivity, the device automatically turns off to help conserve energy.

Accurate measurements even for active babies

Weighing an infant can be challenging, especially when the baby moves, wiggles, or changes position during measurement.

That is why the Neno Integro 2-in-1 smart scale is equipped with a measurement stabilization function that helps provide accurate results even when your little one is slightly active. This feature improves everyday usability and reduces the need for repeated measurements. As a result, you can check your child's weight more quickly and monitor their development with greater ease.

Rotating display for comfortable viewing

The rotating display makes it easy to read results in different configurations of the device – whether you are weighing an infant using the tray or using the scale without any additional measuring accessory.

To change the display position, simply press a button and adjust its orientation to suit the current setup. This ensures the results remain clear and easy to read regardless of how the scale is positioned, making daily measurements even more convenient.

For the whole family

Neno Integro is a smart scale for infants and adults that can serve your family long beyond the newborn stage. **Once the tray is removed, it transforms into a standard bathroom scale**, making it suitable for monitoring the weight of older children and adults as well. With a maximum load capacity of up to 180 kg, the scale can be comfortably used by every member of the family, eliminating the need to purchase a separate scale.

Removable measuring tray

The practical measuring tray makes it easier to weigh infants and monitor their growth. You can quickly attach it to the scale, remove it after use, and fold it in half for compact storage. This convenient solution is ideal for home use, especially when you want to keep everything within reach without taking up unnecessary space.

Understand your body better every day

The dedicated **Neno app** connected to **Neno Integro** allows you to save and analyze up to 14 body composition parameters for adults. This makes it easy to monitor changes in your body, track progress, and adjust your daily habits according to your goals. All information is stored in one place, allowing you to compare results from different days and observe how your body changes over time. It is a valuable tool for anyone who wants to maintain a healthy lifestyle and consciously monitor their physical condition every day.

Anti-slip feet

The anti-slip feet help keep the scale stable during measurements – whether it is placed on the floor or used with the infant measuring tray on a countertop or another flat surface. This prevents the scale from shifting during use, making daily weighing safer, more comfortable, and more reliable for infants, older children, and adults alike. It is a small detail that makes a noticeable difference in everyday use.

SPECIFICATION

Minimum weight:	0.2 kg
Maximum load with tray:	20 kg
Maximum load without tray:	180 kg
Measurement accuracy:	10 g
Measurement unit:	kg/lb
Display:	LCD 73 × 30 mm
Dimensions with tray:	53 × 27 × 6 cm
Dimensions without tray:	30 × 30 × 1.5 cm
Material:	tempered glass, ABS
Power supply:	2 × CR2032 (3 V DC), not included
Overload indicator:	yes
Low battery indicator:	yes
Auto power off:	yes, after 1 minute
Display rotation:	yes
Tare function:	yes
HOLD function:	yes
Weight with tray:	1.93 kg
Weight without tray:	1.3 kg
Operating temperature range:	5–35°C
Bluetooth technology:	yes
Dedicated app:	Neno
Analytical data presentation:	full parameter analysis in the app
Newborn data presentation:	body weight, body fat percentage
Package contents:	bathroom scale, 2 tray parts for infant weighing, 2 screws, screwdriver, user manual
Packaging dimensions:	34 × 13 × 34.7 cm
Packaging weight:	2.23 kg
EAN code:	5902479679662
PN code:	NEN-BAB-IN003
Producer:	KGK TREND sp. z o.o. ul. Ujastek 5b, 31-752 Kraków
