Control the machine from your phone and save time

Neno Lente is a formula milk maker that can be conveniently controlled from your smartphone. Simply download the TUYA app to select one of 11 milk concentration programs, adjust the water volume, and set the temperature. Thanks to this functionality, the Neno Lente formula milk maker helps you prepare your baby's meal quickly and allows you to tailor the settings to your family's daily needs – quickly and intuitively.

neno PREMIUM

Less stress, more time for bonding

The Neno Lente formula milk maker turns everyday feeding into a fast and convenient routine. The device prepares a bottle in just a few seconds at the right temperature, so there is no need to heat or cool the water separately. This means real time savings and greater peace of mind during every feeding session. Neno Lente is compatible with most baby bottles available on the market.

A bottle ready in just seconds

Neno Lente reduces meal preparation time to a minimum, allowing you to respond more quickly to your baby's needs – especially when every minute matters. In just a few moments, you can have a ready-to-serve bottle at the perfect temperature. This convenience is particularly valuable at night, during busy days, or whenever your little one wants to be fed right away.

Milk system PRO

Milk System PRO is an intelligent formula preparation system that automatically combines water and formula powder while allowing you to select the appropriate concentration program based on the type of formula you use. The device continuously monitors key operating stages, notifying you if there is no formula powder, no water, no bottle, or if the funnel has been installed incorrectly.

As a result, preparing a bottle becomes more precise, convenient, and safe every day.

neno PREMIUM

Smooth formula without lumps

By selecting the correct formula concentration program, you allow Neno Lente to automatically measure and combine the right amount of water and formula powder. The automatic mixing technology helps achieve a smooth, uniform consistency – without lumps, excess air bubbles, or the need to shake the bottle before feeding. Simply choose the program designed for the formula you use.

5g	$\times 3.33 = 16.65$	→	17	Your program
4g	$\times 3.33 = 13.32$	→	13	Your program
4.3g	$\times 3.33 = 14.32$	→	14	Your program

Intelligent support during feeding

The intelligent sensor system in Neno Lente helps prevent mistakes during formula preparation and gives you greater control over the device's operation. If the bottle is not positioned correctly, the water or formula runs out, or the funnel is installed improperly, the machine will immediately notify you with an appropriate alert. This allows you to prepare your baby's meal with greater confidence and convenience.

neno PREMIUM

All-in-one system

This single device offers functions that make preparing formula and hot beverages easier every day. The formula milk maker features several programs designed to accommodate most types of infant formula. Thanks to the adjustable tray, you can easily fit most bottles available on the market. The device can also heat water on its own, making it useful not only for feeding your baby but also for preparing tea, coffee, and other hot drinks for the whole family.

Convenient preparation of various formulas

The Neno Lente formula milk maker allows you to prepare different types of infant formula with ease. Simply select the appropriate program, and the machine will automatically adjust the amount of powder to the volume of water, helping maintain the correct proportions and achieve the desired consistency. Our formula milk maker simplifies meal preparation regardless of the time of day.

Use your child's favorite bottle

There is no need to change your baby's bottle or daily routine. Neno Lente is equipped with a tray featuring three height adjustment levels, making it easy to fit bottles of various shapes and sizes. Its universal design ensures compatibility with most bottles available on the market, providing hassle-free and convenient formula preparation.

Hot water ready whenever you need it

Neno Lente is more than just a formula milk maker. The device can quickly heat water within a temperature range of 37°C–70°C, making it easy to prepare not only baby formula but also cereal, tea, and other beverages. Simply select your preferred setting, and the machine will precisely heat the water. It is a practical solution that offers greater flexibility and saves time when preparing drinks for the entire family.

Personal system

The Personal System allows you to fully customize the operation of the Neno Lente formula milk maker according to your individual preferences. You can set the water temperature between 37°C and 70°C, making it easy to prepare formulas with the right parameters or heat water for beverages. The system also allows you to choose the dispensing volume from 30 to 240 ml, giving you greater control over every serving. Additionally, the device remembers your settings, allowing you to prepare subsequent portions quickly without reconfiguration.

neno PREMIUM

Perfect milk consistency – effortlessly

The formula maker precisely blends water and formula powder, reducing the formation of lumps and air bubbles that often occur during manual mixing. It's a fast and convenient way to prepare a bottle that is ready to serve – without shaking and without unnecessary effort. The adjustable tray height allows you to position the bottle as close to the funnel as possible, helping minimize the amount of air entering the bottle during preparation. As a result, the formula is smoother, more consistent, and has a more uniform texture.

All the essential functions at your fingertips

The clear touch control panel makes operating Neno Lente fast and intuitive. With just a few taps, you can set the water temperature, choose the desired volume, activate the cleaning function, or select one of the available programs designed for different types of infant formula. The responsive display provides convenient access to the most important settings, ensuring smooth and hassle-free meal preparation.

Convenient formula preparation after dark

The subtle LED backlight enhances the comfort of using the formula milk maker, especially during evening and nighttime feedings. When water and formula are dispensed, a small light automatically illuminates the area around the bottle. This makes it easier to monitor the preparation process without turning on the main light and disturbing your baby's sleep. It is a small detail that makes a big difference in everyday use.

nenor PREMIUM

Practical and spacious containers

The large-capacity water and formula containers ensure that the Neno Lente formula milk maker is always ready to use. Their generous capacity reduces the need for frequent refilling, making everyday operation more convenient. This is especially useful for parents who prepare several bottles throughout the day or want to ensure the device is ready during nighttime feedings. Less time spent refilling water and formula means more time for you and your child.

Quick cleaning with a single click

A dedicated cleaning mode helps maintain your Neno Lente after daily formula preparation. Simply select the appropriate option on the control panel or in the app, and the device will start the cleaning process. This makes using the machine easier, more hygienic, and allows you to prepare subsequent bottles with confidence. For best results, it is recommended to activate the cleaning mode after each use.
